**Subject:** Circle K redevelopment pedestrian safety concerns

As a resident of Iroquois Place, my family and I walk near and/or across the Stadium/Packard intersection daily. My children, a Tappan student and a Burns Park student, use the intersection to travel back and forth to school. Safe and easily accessible sidewalks and crosswalks are critical to my family's and my neighbor's experience in living in this area. The curb cuts for vehicular traffic closet to the intersection at the Circle K location have always proved problematic with cars entering and exiting the Circle K not always mindful of pedestrians. Unfortunately, the proposed redevelopment of Circle K falls short in remedying these curb cuts. I advocate for pushing the curb cuts further from the intersection to make the walking experience safer than it is now. I hope the Commission ensures that the Circle K redevelopment improves pedestrian safety in the neighborhood.

Sincerely,  
Jennifer Kinsey
