**Subject:** Question/concern about dangerous pedestrian cross walk

To whom this may concern,

My name is XXXXXXXXX and I am a resident of Ann Arbor and a mom of AAPS students. I'm writing to ask your help in making several cross walks more safe for our students, families and community.

The on and off ramps to M14 near skyline high school/Maple road are an accident waiting to happen. Both pedestrians and cyclists correctly using the designated paths for crossing these streets are often put in extreme danger by motorists not slowing enough as they get on and off the freeway.

I would like to request that flashing signage be added to these crosswalks for pedestrians to push and alert cars to stop and wait. Can you help me? How would I go about petitioning the city or transportation department to make this happen or who should I contact?

Thank you so much! I've included a picture to identify the two spots that are in desperate need of advanced safety measures.

Sincerely,  
XXXXXXXXXX
