

2250 Ann Arbor – Saline Road
 Apartment Community Project

We, the residents of Ascot Rd in Ann Arbor, MI, request that the City Planning activity, Developer and Architect remove from the subject project any access to Lambeth Rd. This is a residential area with relatively narrow streets that usually have considerable on street parking. Lambeth leads only to Ascot which curves around the corner resulting in sight lines that do not safely accommodate traffic from a complex that has the capability of 150 vehicles. The street was designed for local resident traffic only from the 20 homes that it serves and it should continue as such.

We request that site plan SP14-023 be revised to remove any access to Lambeth.
