G OLD BUSINESS

G1 16-1430 HBA 16-002 818 CHURCH RADON REPORT

Attachments: 818 Church Radon report 9 20 16.pdf

Update from site visit, T. Durham suggests that with the addition of fire sprinkler heads that the variance should be granted.

A. Rasmussen motions that for the hearing for HBA16-002, 818 Church Street, Ann Arbor, MI that the Board approve the variance(s) subject to the report of the sprinkler head test.

K. Schweighofer ammends the motion to also include the five different variance appeals subject to the required radon test, sewer clean and check report, the second means of egress 8.504(3a); grade 8.503(6); stair and doorway width 8.11 & (8.12); ceiling height and corridors 8.21 & 8.22.

Approved as Amended

G2 HBA16-008 1120 SOUTH FOREST STREET

Update from legal department for an appeal from the heating system maintenance requirements for HBA16-008, 1120 South Forest Street, Ann Arbor, MI.

K. Schweighoefer motions to deny the appeal for HBA16-008, 1120 South Forest, Ann Arbor, Michigan for several reasons; more than five years has lapsed since the furnace was installed in 2010, the certificate of compliance cycle has ended in March 2015 and no evidence of regular furnace maintenance being performed by a licensed mechanical contractor. In this case practical difficulties or unnecessary hardships do not exist. This appeal violates the chapter, and the intent of the deviation will cause deterioration of the heating facility and will not save costs to the owner or the renter and avoidance jeopardizes the public health and safety. K. Schweighoefer motions to furthermore direct City staff to clarify the language because it is clear but then some misinterpretations on this item exist, and so going forward would like to see some clarification in the future.
