Mr. Kowalski,

I can not attend due to the fact that I am working on a third world country. I am actually from a third world country, but as a citizen of the USA having the privilege to live in Ann Arbor hope that you continue to keep this great city intact. FYI, in circumstances like the one on South Pond the answer is simple. In the third world country that I am from(Argentina being the place), politicians take the side of preserving the environment except of course when special interests are involved and that will change the outcome only to fulfill the hunger for money for developers and all decision makers as well.

We pay high taxes for a reason and that is for having the privileged of living in a great place, I hope you do not change that spirit so we will have lots of houses and nothing to be special for.

Please you know that in your hands is the future of a great city like Ann Arbor

Since English is not my first language if there is something unclear or I might offend someone due to my comments , please feel free to contact me by email or directly by phone. 5868598401

Thank you ,

Ariel Nicolaci.
