

AIRSPACE CASE NUMBER: 12-AGL-39NR

TO ALL INTERESTED PARTIES

PROPOSAL: This is a proposal to consider the option of decommissioning the Waterville (VWV) Very High Frequency Omni-Directional Range (VOR), at Waterville, Ohio. The Distance Measuring Equipment (DME) will be retained or replaced with a stand-alone DME for use in the Next Generation Air Transportation System (NextGen). A proponent has requested permission to build a large warehouse near the VWV VOR, which would cause interference with the VOR, and render it wholly or partially unreliable. VWV VOR has been identified as a candidate for discontinuance by the Navigation Program Office, in the VOR Minimum Operational Network (MON) Implementation Program information package. More information can be found regarding the VOR MON in the Federal Register Notice Volume 76, No 241/Thursday December 15, 2011/Proposed Rules.

Should the study show that the decommissioning of the VWV VOR would not be detrimental to the NAS, the device will be removed without replacement.

PROPONENT: Joel Cavazos
CSA Planning and Requirements – En Route
2601 Meacham Boulevard
Fort Worth, TX 76137

LOCATION: The physical component of this system is located:

Latitude: 41° 27' 05.24" N
Longitude: 083° 38' 19.42" W

This circularization is intended to provide the public with the opportunity to review and comment to the effect this proposal may have on aeronautical activity. The issuance of this non-rule circular is to give notice of impending action within the National airspace.

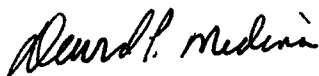

Comments regarding this proposal should be made in writing and directed to:
