Invites you to join us at the...

West Park Storm Water Project Public Meeting #2

Public Meeting

Monday, February 13, 2012

7:00 p.m. – 8:30 p.m.

**Slauson Middle School Media Center
1019 W. Washington Street**

In 2010, the City and the Washtenaw County Water Resources Commissioner's Office undertook a stormwater quality improvement project in conjunction with the planned renovations in West Park. During construction, some inadequacies were found with the design of the system, and the collapse of one of the swirl concentrator units was experienced at the end of the project. The City has now completed an investigation of these problems, and is developing a plan to correct them in 2012.

This meeting, the second in a series of two meetings, will focus on the technical aspects of the proposed design. The design consulting firm, Orchard, Hiltz & McCliment (OHM), will be present to go over their draft design plans for modifications to the stormwater treatment systems, and discuss the results of the localized modeling that they performed. City staff will also discuss the next steps to be taken to complete the project, an updated schedule, and address any questions or concerns.
