

Dear Mr. Barrett,

I am writing in regard to McKinley Inc's request for a zoning variance at 2502 Packard Street AKA The George. I was unable to attend the public forum but wish to submit my concerns. I am a resident at 2509 Packard Street AKA The Ponds at Georgetown. I strongly feel that they **should not** be granted this variance.

I am concerned not necessarily about the height regulation in question, but the height of the sign in combination with its illumination. I live across Packard with several windows facing the project, and the external lighting on The George is extensive. Extensive to the point of nuisance, especially on the outer sides of the property. And illuminated at all hours. Should McKinley be granted their variance, they will undoubtedly seek to illuminate their overlarge sign in a similarly garish fashion, and I would really rather that not happen.

Sincerely,

--
