ANN ARBOR HISTORIC DISTRICT COMMISSION

Staff Report

ADDRESS: 1034 West Liberty Street, Application Number HDC14-026

DISTRICT: Old West Side Historic District

REPORT DATE: March 13, 2014

REPORT PREPARED BY: Jill Thacher, Historic Preservation Coordinator

REVIEW COMMITTEE DATE: Monday, March 10, 2014

OWNER APPLICANT

Name: Armen & Emily Hratchian Same

Address: 1034 W Liberty St Ann Arbor, MI 48103

Phone: (517) 974-8227

BACKGROUND: This one-and-three-quarter story bungalow features a stuccoed first floor and shingles on the second floor, a cross-gabled roof plan, and a full-width stuccoed front porch with knee-walls flanking the front stairs. It first appears in Polk City Directories in 1919 as the home of Lucy and George L. Haarer. George was a partner at Lindenschmitt, Apfel & Co. clothiers, hatters and furnishers, at 209 South Main.

In November, 2013, the owners received a certificate of appropriateness to replace a slate roof with an asphalt roof, on the condition that the asphalt roof is reviewed by the Commission.

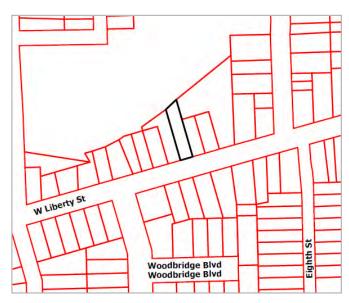

LOCATION: The house is located on the north side of West Liberty Street, east of Eberwhite Boulevard and west of Eighth Street. It backs up to Slauson Middle School.

APPLICATION: The owners are proposing to use GAF Camelot asphalt shingles to replace the existing slate roof.

APPLICABLE REGULATIONS:

From the Secretary of the Interior's Standards for Rehabilitation:

(6) Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color,

texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.

From the Secretary of the Interior's Guidelines for Rehabilitating Historic Buildings (other SOI Guidelines may also apply):

Roofs

<u>Recommended</u>: Replacing in kind an entire feature of the roof that is to deteriorated to repair, using the physical evidence as a model to reproduce the feature.

If using the same kind of material is not technically or economically feasible, then a compatible substitute material may be considered.

Building Site

<u>Recommended</u>: Identifying, retaining, and preserving buildings and their features as well as features of the site that are important in defining its overall historic character.

<u>Not Recommended</u>: Removing or radically changing buildings and their features or site features which are important in defining the overall historic character of the property so that, as a result, the character is diminished.

From the Ann Arbor Historic District Design Guidelines (other Guidelines may apply):

Roofs

<u>Appropriate:</u> Replacing historic roofing material that is deteriorated beyond repair with matching materials. If using the original is not technically feasible, then compatible substitute materials may be considered.

Not Appropriate: Replacing historic roofing materials that are repairable.

STAFF FINDINGS:

- 1. In November of 2013, the HDC approved the removal of the existing slate roof, and conditioned its replacement with asphalt on Commission review of the new material. The homeowners have provided a sample to staff of GAF Camelot shingles in the color Antique Slate. The shingles are layered with a strong shadow line to give them more dimensionality than standard shingles, and the ridges are capped. Staff appreciates that the homeowners have chosen a style that emulates slate as closely as possible for asphalt, instead of a less expensive standard shingle.
- 2. Staff's opinion is that the proposed asphalt shingles are an appropriate size, color, and style that are a reasonable replacement for the existing roof. The work is compatible with the house and neighborhood and meets the Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings, in particular standard six and the guidelines for roofs and building site, as well as the Ann Arbor Historic District Design Guidelines, particularly as they pertain to roofs.

MOTIONS

Note that all motions are worded in the affirmative, and are only suggested.

I move that the Commission issue a certificate of appropriateness for the application at 1034 West Liberty Street, a contributing property in the Old West Side Historic District, to install roof using GAF Camelot shingles, as proposed. The work is compatible in exterior design, arrangement, texture, material and relationship to the rest of the building and the surrounding area and meets *The Secretary of the Interior's Standards for Rehabilitation* and *Guidelines for Rehabilitating Historic Buildings*, in particular Standard 6 and the guidelines for roofs and building site, as well as the *Ann Arbor Historic District Design Guidelines*, particularly as they pertain to roofs.

MOTION WORKSHEET:

I move that the Commission issue a Certificate of Appropriateness for the work at <u>1034 West Liberty Street</u> in the <u>Old West Side</u> Historic District

Provided the following condition(S) is (ARE) met: 1) STATE CONDITION(s)

The work is generally compatible with the size, scale, massing, and materials and meets the Secretary of the Interior's Standards for Rehabilitation, standard(S) number(S) (circle all that apply): 1, 2, 3, 4, 5, 6, 7, 8, 9, 10

ATTACHMENTS: application, drawings, photos.
