Subject: Site Plan for 542-544 N. Main

Dear Planning Commission Members,

I am writing in support of the site plan for the housing development proposed for 542-544 N. Main Street which will come before you on 6/16/15.

As residents of 538 N. Main Street, my husband I will live next door to the proposed project. This thoughtfully planned project is designed with consideration for our property line and therefore will feel less intrusive than a building that could have been much closer.

The size, scale and careful design of this project make it a great addition to the neighborhood. We understand the project meets all zoning and planning requirements and will enhance the existing streetscape. We believe the new building will increase the property values in the neighborhood.

Sincerely,

Barbara Jean Barden

Tom Carlson
