Environmental Commissioners -

Please see the below note from Chairperson Mitchell regarding our June 22nd meeting. This will be a non-televised working session to discuss the Commission's working groups.

Thank you,
Sean

This message was sent from outside of the City of Ann Arbor. Please do not click links, open attachments, or follow directions unless you recognize the source of this email and know the content is safe.

Dear Environmental Commissioners,

Our June 22 Environmental Commission meeting will be a working session, during which we will focus on the Commission workgroups. The goal will be to have informal discussion about issues that are the focus for each work group, and goals for the coming year. I suggest that we all think of target outcomes and measureable goals. We will have a discussion about the potential for staff support for each of the workgroups, identification of community environmental issues that are not addressed, and whether there are issues that will benefit from combined attention from more than one workgroup.

Existing work groups and lead Commissioners are:

Natural Features, Chris Graham

Pollinators, Rita Mitchell

Solid waste, John Callewaert

Water quality, Steve Brown

The meeting will be remote, by Zoom, with the option for recording, and will have public comment periods, but the meeting will not be televised live via CTN.

I look forward to our discussion, and planning for agendas for the upcoming year.

Thank you all for your work to support a clean, livable environment in Ann Arbor and beyond!

Rita
