Subject: Statement for Planning Commission, February 8, 2011, re: 2011-2015 Draft Parks Recreation and

Open Space Plan

Hello Ms. Beaudry,

Please print and include both electronic and hard copy versions of my statement, which follows, to the Ann Arbor City Planning Commission, for the agenda for February 8, 2011.

Thank you,

Rita Mitchell

Re: 2011-2015 Draft Parks Recreation and Open Space Plan

Dear Planning Commissioners,

I am writing to comment on the draft 2011-2015 PROS plan, which is on your agenda to review on Tuesday, February 8. I have previously provided city staff members with my comments, in detail. This message is to you, and addresses some items that I consider to be of high priority:

1 - On page 3 of the draft document, you will find that distribution of parks and open spaces is uneven across the city, with the least amount of open space available in the Central Planning area, of 3.7 acres per 1000 citizens, using 2000 census statisticsa. Compared with the overall city average of 18.32 acres per 1000 citizens, the most densely populated area of the city lacks comparable open space. Note that the overall average of parkland acreage per 1000 for the city is much reduced by the extremely limited open space in the Central Planning area.

Given that Planning Commission and Council have created plans to support more dense population in the Central planning area, it makes sense to provide for an increase in open space for the area. Given also that the current unsupportable city move to repurpose 10.3 acres of park land in Fuller Park for a parking structure, a project that I oppose strongly, the park land and open space in the Central Area will decrease significantly from the rate for the year 2000 census population. Even if park land is not repurposed, I recommend that the PROS plan be modified to direct staff to develop park land and open space in the Central Planning area, to provide those who live there with better access to an amenity that will encourage them to continue to live in the central core. The Allen Creek Greenway is a reasonable option for additional central area open space.

- 2 The Allen Creek Greenway is a potential source of green, open space, alternative transportation, and contribution to environmental improvements of one of Ann Arbor's major watersheds. The draft PROS plan openly minimizes the positive benefits of the Allen Creek Greenway, requests limited funds for the project, and delays action on the Allen Creek Greenway, regardless of the fact that it is supported by the greatest number of positive comments in the open ended survey questions made available to citizens, with more favorable comments than the skatepark (See attached detailed comments in response to survey question #13). I request that you direct staff to modify reference to the Allen Creek Greenway to raise the priority of it throughout the document, consistent with support expressed by citizens.
- 3 On page 85, maintenance of existing park land over acquisition of park land is linked specifically to the Allen Creek Greenway. Given that parkland will be acquired within the city limits, using Greenbelt millage revenue, maintenance concerns are applicable to ANY park or open space and should not be tied specifically to the Allen Creek Greenway. In fact, additional open park land in the downtown area will qualify as both urban greenspace and neighborhood parks for residents of the Central planning area.

You will see in the graphs accompanying the discussion on page 85, that the number of respondents who consider acquiring additional neighborhood parks and acquiring urban park space are nearly equal. I ask that the statement on page 85 be modified to indicate two distinct concepts:

- a. There is significant community support for the Allen Creek Greenway, as evidenced by individually written responses to the survey questions. (Analysis of Survey Question 13 open ended responses for specific text terms in support of: Allen Creek Greenway 150, Skatepark 140, Dogpark 60 as listed in attached worksheet). Read the remaining free-text responses and you will see additional support for the above three concepts, using other non-specific terms.
- b. There is community concern that new maintenance of all park space be planned, continued, and supported.
- 4 Page 39 of the draft document directs staff to move forward with public/private partnerships. I am concerned about the emphasis on this approach to addressing budget shortfalls. If we turn our public lands over to private management, or use more advertising on-site in park spaces, we will erode the value to the citizens who actually own the park resources. I urge you to modify the PROS document, to eliminate the strong emphasis on public/private partnerships, and to provide strong guidance regarding any relationships that are considered correct. Please help to avoid using our public park land as commercial advertising opportunities.
- 5 Budget information provided in the report is confusing as presented. Please ask staff to revise the information so that sources of funds, and use of funds for expenses are clear. Including labels on the pie charts may help. It is difficult to determine which activities are supported by general funds versus millage funds, and to follow that information over time. Please recommend that the detail be improved so that citizens will understand the revenue and expense components as sourced from General Funds and from Parks Millages.

I appreciate your review of this information, and request your support of the changes I have suggested, to the draft version of the 2011-2015 PROS Plan.

Thank you,

Rita Mitchell 621 Fifth St. Ann Arbor, MI 48103

|   |                              | In-town urban green space, specifically the Allen Creek Greenway. It will service as green infrastructure, non-motorized connectivity across town, and as a resource for respite and recreation for those who live, work and visit downtown Ann Arbor.  In line with my comments on Q. 10, I vote for a downtown greenway. | 1          |  |   |
