**RE: RFP No. 980 – Interim Operation of Ann Arbor Material Recovery Facility (MRF)
And Waste Transfer Station**

Waste Management of Michigan, Inc. (WMM) is pleased to respond to the above referenced service project for the City of Ann Arbor. WMM, an environmental solutions company, has provided commercial, industrial, disposal and residential services to our customers in the State of Michigan since 1944. We are proud to list the City of Ann Arbor as a major customer for almost a decade.

WMM is proud that the City currently relies on our experience and ability to offer a valuable service while sustaining current recycle processing and solid waste disposal. To this end, we have reviewed the RFP document and addendum and clearly understand the services and goals the City has outlined. For reasons outlined in Exhibit A, our response is focused on continuation of the services WMM provides under the existing General Services Agreement with addition of the modifications to this service level contained in the RFP.

Following the opening and analysis of any proposals received in response to the RFP, if the City finds the proposals do not meet their needs and goals, WMM remains available to further discuss service options, including continuation or modification of the current agreement if this appears beneficial to both parties.

Thank you for the opportunity to service the City of Ann Arbor!

Sincerely,

A handwritten signature in blue ink that reads 'Denise J. Gretz'.

REQUEST FOR PROPOSALS INTERIM OPERATION OF ANN ARBOR MATERIAL RECOVERY FACILITY (MRF) AND WASTE TRANSFER STATION

FRIDAY, OCTOBER 28, 2016

SUBMITTED BY:

EXHIBIT A
SCOPE OF SERVICES

PROFESSIONAL QUALIFICATIONS

Waste Management of Michigan, Inc. (WMM) Area Office is located in Wixom, MI, 48797 Alpha Drive, 48393. The company is incorporated and licensed to operate in the State of Michigan, maintaining our status as Company in Good Standing since incorporation in 1944.

Key professional personnel:

John Myers, Area Director Disposal Operations
Frank Fello, Area Director Disposal Operations
Patrick Greve, Area Manager Public Sector Solutions
Paul Mazanec, Engineering and Compliance
Betty Trimper, Material Recovery Manager
Derek Logan, Operations Manager
Brian Conaway, Public Sector Solutions Representative

This professional team listed above currently manages the various components and services of the existing General Services Agreement between the City of Ann Arbor and Waste Management, titled the Short-Term Operation of the Materials Recovery Facility and Waste Transfer Station. WM currently utilizes Custom Ecology Inc. (CEI) as the sub-contractor who transfers MSW from the Platt Road Transfer Station to the WM Woodland Meadows Landfill in Wayne, MI. Circle 8 is the sub-contractor who transfers recycle baled material to the Akron, OH and Saginaw, MI MRF's.

PAST INVOLVEMENT WITH SIMILAR PROJECTS

WMM, has provided residential, commercial and industrial services in the State of Michigan since incorporation in 1944. WMM offers an extensive network of waste and materials management services, including transportation, landfill development, management and disposal services, state of the art material recovery facilities, industrial, commercial and residential services. We have a network of sub-contractors to assist and provide support services to complete the circle of service excellence. WMM is committed to perform all operations in full compliance with applicable federal, state and local regulations. We have the financial resources to support the facilities, manpower, management teams and infrastructure necessary to fulfill the contractual commitments and obligations established as a result of RFP responses and negotiated service agreements. As demonstrated by our performance under the existing service agreement -- WM teams have the skills, training and professionalism necessary to continue the current services WM provides for the City of Ann Arbor with the modifications noted in the RFP. Please see the WMM references included with this proposal.

PROPOSED WORK PLAN

We propose to continue the existing single-stream recyclables bale, transfer and marketing services and solid waste loading and transfer services with the modifications outlined in the RFP Scope of Services. We will continue to utilize the current online computerized scale house reporting system, verification of material movement and disposition through MRF and landfill inbound scales, maintain the existing

methods of contact and communication, professional and operating personnel as they exist today at both the MRF and Transfer Station with the modifications in scope noted in the RFP for this aspect of the service.

WMM operates a network of Material Recovery Facilities, in particular the Akron Ohio and the Saginaw, MI MRF's, where the City of Ann Arbor baled single stream recycle materials and OCC are taken for processing and final marketing. Our management and operations team will continue to follow the current procedures and processes to fulfill the Scope of Work outlined in the RFP and meet the goals of the City of Ann Arbor for the processing, recycle material management/marketing and MSW material loading and transportation.

Finally, for the following reasons, WMM cannot fully respond to the short-term MRF On-Site Processing Operations utilizing the existing sorting equipment. The minimum six-month timeframe of the anticipated contract makes it impractical to cost effectively staff and train the quantity of personnel (approximately 20-25) necessary to fulfill the contract in this regard. In addition, the condition of the sorting equipment will remain unknown until some date in the future with some duration of time thereafter necessary to improve its condition. In summary, the timeframe for assessment and reconditioning of equipment followed by staffing and training appears to be nearly the same or longer than the anticipated timeframe for short-term operation. Finally, if WMM is the short-term operator we will continue to work toward this goal in conjunction with the City in order to allow for a long-term operating scenario including the City's potential procurement process to select a long-term operator.
