Subject: Amendments to Modify Home Occupation Regulations

This message was sent from outside of the City of Ann Arbor. Please do not click links, open attachments, or follow directions unless you recognize the source of this email and know the content is safe.

Thank you for your consideration of the feedback regarding home studios. I fully support the idea of focusing on outcomes in home occupation regulations, as opposed to arbitrarily blacklisting entire categories.

I wanted to add that the "Electronically amplified sounds shall not be audible from adjacent properties or public streets" clause is also problematic. The threshold of audibility is unnecessarily restrictive, and again, there are already day and night noise thresholds in the city code that address this.

Thanks so much!
