Subject: Code Prohibiting Natural Gas Connections for New Buildings

Dear Ann Arbor Planning Commission,

I am writing in support of new code for city's development to prohibit natural gas connections for new buildings starting in 2023. The effects of climate change are upon us and we need to take real action NOW. This code would be a genuine step for Ann Arbor to show leadership in reducing carbon emissions. This transition won't necessarily be easy, but it is of critical importance. We need to show the rest of Michigan and the country that it can be done, and this is an essential step.

Thank you for putting the planet first and voting in favor of this new code.

Sincerely,

Robin Frisch-Gleason
