

PLANNING AND DEVELOPMENT SERVICES STAFF REPORT

For Planning Commission Meeting of December 17, 2013

**SUBJECT: Germain Motors Site Plan for City Council Approval
(2575 South State Street)
File No. SP13-048**

PROPOSED CITY PLANNING COMMISSION MOTION

The Ann Arbor City Planning Commission hereby recommends that the Mayor and City Council approve the Germain Motors Site Plan, subject to variances for parking lot and landscape modifications being granted by the Zoning Board of Appeals.

PROPOSED CITY PLANNING COMMISSION MOTION

The Ann Arbor City Planning Commission hereby approves the proposed landscape modifications in order to reduce the requirement for depressed landscape islands, according to Chapter 62 (Landscape and Screening Ordinance), Section 5:608(2)(c).

STAFF RECOMMENDATION

Staff recommends that this petition be **approved** because, if the requested variances are approved, it complies with all the applicable local, state, and federal laws, ordinances, standards, and regulations; the development would limit the disturbance of natural features to the minimum necessary to allow a reasonable use of the land; would not cause a public or private nuisance; and would not have a detrimental effect on public health, safety, or welfare.

STAFF REPORT

The Germain Motors Site Plan was postponed by the Planning Commission at the November 19, 2013 meeting to allow the petitioner to revise plans to address concerns noted by staff and Planning Commission regarding the expansion of the proposed parking areas and additional impervious surface.

The petitioner has submitted revised plans in response to the comments received. All plan revisions deal with the proposed parking lot expansion and required landscaping. There have been no changes to the buildings or overall site layout. City staff has confirmed revisions to the plan help address these concerns, as described below.

Porous Pavers - The plan has been modified to install an additional 5,027 square feet of porous pavers for the expansion of the display areas along State Street and Oakbrook Drive. While the extent of the parking area remains the same, the pavers will reduce total impervious surface on

the site. The pavers will be designed to match the existing porous pavers previously installed in a display area along Oakbrook Drive.

Interior Landscape Islands – The petitioner has added 8 new depressed landscape islands to the parking storage areas in the rear. Consistent with City Code, the addition of these landscape areas breaks the expanse of the parking area into no more than 15 consecutive spaces and results in the removal of 24 parking spaces. As a result, the variance request to eliminate the requirement of installing the landscape islands has been withdrawn.

The depressed landscape islands also allow for additional infiltration of storm water runoff. The landscape islands decrease the impervious surface on the site by 2,998 square feet and provide a planting area for 16 additional trees (2 trees per landscape Island).

Landscape Modification Request – The Landscape Modification has now been modified to eliminate the request for the reduction of 8 trees to be planted on site. With the additional landscape islands now proposed, all required trees will be planted on the site.

The Landscape Modification request remains in order to permit the existing landscape islands to remain without alterations (depression) that allow infiltration. Due to the location of these landscape islands and existing trees, Natural Resources staff is supportive of the revised modification request.

Variations – As mentioned previously, the variance from the requirement of interior landscape islands in the storage areas has been withdrawn. The remaining variances for exceeding the maximum amount of small car parking spaces, reduced aisle widths and allowing stacked parking remain. Based on the changes to the plan to reduce impervious surface on site and the proposed car storage use, Planning staff is supportive of the revised variance request.

Vegetated 'Green' Roof – The petitioner contacted an architect specializing in green roofs to assess the possibility of constructing a green roof on one or all of the buildings. The architect discussed with City staff and contacted numerous sources in the area. The petitioner has indicated that a vegetated roof is not feasible without significant alterations to the existing buildings. An email summarizing petitioner's efforts is attached.

REVISED PARKING COMPARISON CHART

	EXISTING	PROPOSED	REQUIRED
Parking – Automobiles*	331 spaces – Regular 460 spaces – Small Car 791 total spaces*	188 spaces – Regular 851 spaces – Small Car** 1,015 total spaces	430 spaces MIN No maximum
Parking – Bicycle	6 Class C	14 Class A 14 Class C	14 Class A MIN 14 Class C MIN

PLANNING AND DEVELOPMENT SERVICES STAFF REPORT

For Planning Commission Meeting of November 19, 2013

**SUBJECT: Germain Motors Site Plan for City Council Approval
(2575 South State Street)
File No. SP13-048**

PROPOSED CITY PLANNING COMMISSION MOTION

The Ann Arbor City Planning Commission hereby recommends that the Mayor and City Council approve the Germain Motors Site Plan, subject to variances for parking lot and landscape modifications being granted by the Zoning Board of Appeals.

PROPOSED CITY PLANNING COMMISSION MOTION

The Ann Arbor City Planning Commission hereby approves the proposed landscape modifications in order to use existing vegetation to count toward the interior parking lot landscaping requirements and eliminate the requirement for depressed landscape islands, according to Chapter 62 (Landscape and Screening Ordinance), Section 5:608(2)(c).

STAFF RECOMMENDATION

Staff recommends that the rezoning and site plan be **postponed** to give the petitioner an opportunity to address staff comments.

LOCATION

The site is located on east side of South State Street at the corner of Oakbrook (South Area, Malletts Creek Watershed).

DESCRIPTION OF PETITION

The petitioner seeks to construct additions to two of the three existing buildings on the site and construct an additional 248 vehicle parking spaces. The three buildings on site are composed of auto showrooms and service functions for Porsche/Audi, Volkswagen and Honda. As part of this project, some of the dealerships will switch buildings: Volkswagen will occupy the northernmost building; Porsche/Audi will occupy the middle building; and Honda will remain in the southernmost building.

The petitioner is proposing a 4,877 sf addition to the Volkswagen building, for a total building size of 18,722 sf. A 6,429 sf addition is proposed to the Porsche/Audi building, for a total building size of 31,097 sf. The Honda building will not have any building additions and will remain 36,101 sf.

The site currently contains 791 vehicle parking spaces, with an additional 248 parking spaces proposed for a total of 1,039 parking spaces. The majority of the site's parking spaces are used for vehicle display and storage. The additional vehicle parking spaces will be located along the southern half of the S. State Street frontage, along the Oakbrook Drive frontage and in the rear car storage lots. The vehicle storage area located in the rear of the site is comprised of two large parking areas divided by an engineered vegetated slope and retaining wall.

The petitioner is requesting three variances from Chapter 59 (Off-Street Parking) in order to allow tandem parking, reduced aisle widths and exceed the maximum percentage (30%) of small car parking spaces. The petitioner is also requesting one variance from Chapter 62 to eliminate the requirement for required interior landscape islands in the car inventory and display areas.

A total of 28 bicycle spaces are required: 14 Class C bicycle spaces and 14 Class A spaces. All Class C spaces will be provided near the three building entrances, and the Class A spaces will be provided inside each building.

There currently are three curb cuts on South State Street providing access to the site; no modifications to the drives are proposed. Pedestrian connections have been added from the South State Street sidewalk to building entrances, as well as internal sidewalks in between buildings and customer parking areas on the site.

There are existing storm water facilities on the east side of the site and an adjacent site (same owner) across Boardwalk to the east of the site. The storm water facilities are under the jurisdiction of the Washtenaw County Water Resources Commissioner (WCWRC). Based on the total of impervious surface on the site, the petitioner is required to provide first flush, bankfull and 100 year storm detention capacity. The WCWRC has reviewed and approved the storm water plan, which includes minor modifications to the existing system and maintenance items to be addressed during construction.

There are four landmark trees located on the north side of the site, and three of these are proposed to be removed. The landmark trees are being removed for the expansion of the parking area and are not impacted by the proposed building additions. The alternatives analysis provided indicates that in order to preserve the three landmark trees and provide the amount of parking desired, a parking structure would need to be constructed. Eleven additional trees will be planted as mitigation for the landmark tree removal. There are no other natural features on the site.

The petitioner is requesting a landscape modification in order to reduce the total number of trees provided (95 provided, 103 required) within interior landscape islands and eliminate the requirement for depressed landscape islands. The petitioner's Landscape Modification Request application and justification are attached.

The project is proposed to be completed in three phases. The first phase will consist of building and parking modifications to the center building (Porsche/Audi) and the southern building

(Honda). The second phase will be the building addition and parking lot modifications to the northern building (Volkswagen). The final phase will consist of construction of the additional parking areas in the rear of the site. The estimated cost of construction will be \$5.5 million.

As required by the Citizen Participation Ordinance, the petitioner mailed out postcard notification. There were no comments submitted by the public in response to the mailing. Staff has not received any feedback from the public in regards to this petition.

COMPARISON CHART

		EXISTING	PROPOSED	REQUIRED
Zoning		M1A (Limited Light Industrial District)	M1A (Limited Light Industrial District)	M1A (Limited Light Industrial District)
Gross Lot Area		426,017 sq ft (9.78 acres)	426,017 sq ft (9.78 acres)	13,000 sq ft MIN
Maximum Gross Land Coverage of Structure		13.9%	16.1%	40% MAX
Maximum Useable Floor Area in % of Lot Area		17.5% (74,614 sq ft)	20.2% (85,920 sq ft)	75% MAX (319,512 sq ft)
Setbacks	Front – State Street (center building)	63 ft	54 ft	15 ft MIN No maximum
	Front-Oakbrook	118 ft	118 ft	15 ft MIN No maximum
	Front – Boardwalk	600+ ft	600+ ft	15 ft MIN No maximum
	Side	31 ft 6 in(north)	1 ft 9 in(north)	None
Height		24 ft MAX	24 ft	35 ft MAX
Parking – Automobiles*		331 spaces – Regular 460 spaces – Small Car 791 total spaces*	188 spaces – Regular 851 spaces – Small Car 1,039 total spaces**	430 spaces MIN No maximum
Parking – Bicycle		6 Class C	14 Class A 14 Class C	14 Class A MIN 14 Class C MIN

Note: There is no rear setback because the site has frontage on three public streets; the remaining property lines are classified as sides.

* Variances granted, May 2005

SURROUNDING LAND USES AND ZONING

	LAND USE	ZONING
NORTH	Public School Transportation Facility and Office	M1 (Limited Industrial District)
EAST	Storm Water Facility, Railroad, Industrial	M1A (Limited Light Industrial District) and M1 (Limited Industrial District)
SOUTH	Office	O (Office District) and ORL (Office, Research and Limited Industrial District)
WEST	UM Commuter Parking Lot	O (Office District)

HISTORY

The site, with the existing Volkswagen dealership building, was annexed into the City in 1968. A site plan for the Honda dealership building was approved in February 1971. The Zoning Board of Appeals approved variances in July 1972 to allow parking in the front setback, and in August 1976 for a 24-inch tall screen and five-foot wide landscape buffer at State Street. Revised site plans were approved in September 1979 to expand the showroom and in August 1986 to expand the Honda service area. The site plan was administratively amended in November 1986 to shift the location of the detention area to the southeast corner of the site. The Zoning Board of Appeals (ZBA) granted variances in December 2000 to allow reduced aisle widths, stall dimensions, an excess of small car spaces and stacked parking only in the vehicle storage area and a revised site plan was approved in February 2001 to expand the Honda dealership. Construction was never initiated, however. In December 2003, a site plan was approved to construct a new automobile dealership building (replacing an existing structure), to add a carwash facility (for the dealership's use only), to expand the parking and vehicle storage areas, and to establish a storm water management system for the entire 12.37 acres. This construction was completed in 2004.

In April of 2005, Planning Commission denied a proposal to construct 13 stacked parking spaces within the Oakbrook Drive front setback and two vehicle display pads within the State Street front setback. The proposed project did not meet City Code requirements and could not be approved without variances from the ZBA. After Planning Commission action, the petitioner applied to the ZBA for the necessary variances to permit the modifications requested. In May 2005, the ZBA granted a variance to allow the stacked parking within the Oakbrook Drive front setback, reducing the setback from 52.70 feet to 34.48 feet. At the ZBA meeting, the petitioner indicated that due to the installation of Oakbrook Drive, the setback along the southern property line was changed from a side setback (25 feet minimum) to a front setback (52.70 feet minimum) presenting the petitioner with an unreasonable hardship. The ZBA concluded that because of the nature of this change in required setbacks, a hardship did exist and subsequently granted the requested variance. At that same meeting, the ZBA denied the variance requested to install two vehicle display pads within the front setback of State Street.

The petitioner submitted a new plan for Planning Commission approval in June of 2005. The new plan proposed adding only the 13 additional stacked parking spaces and not the vehicle display pads. This plan was approved and proposed construction was completed in 2005.

In January 2011, revisions were approved to Chapter 55(Zoning) which reduced the front setback requirement from 40 feet to 15 feet.

PLANNING BACKGROUND

This site was included in the recent South State Street Corridor Plan and recommended for office, research and limited industrial uses in the future and ORL zoning (Area 1 land use recommendations). The Plan recommends enhanced non-motorized access to buildings and addition of “gateway” features to prominent sites along the corridor. In addition, the Plan states specific recommendations for Resource Management within the corridor. The recommendations include integrating better stormwater management methods (as identified in the Mallett’s Creek Restoration Plan) and ensuring future development is consistent with the adopted Natural Features regulations.

The Non-Motorized Plan recommends improved pedestrian connections between the buildings and the street. Bicycle lanes are available along South State Street in front of this location.

STAFF COMMENTS

Systems Planning (Engineering) – Adequate utilities exist to serve the site. No footing drain disconnects will be required. Petitioner must record an easement over the existing sanitary sewer main.

Planning – The proposed additions and renovations to the existing buildings will be a significant upgrade to the site and improve building appearance from South State Street. The addition of pedestrian connections to the buildings and added bicycle parking are consistent with intent of the Master Plan: Land Use Element and the South State Street Corridor Plan.

Planning staff has concerns regarding the amount of parking proposed to be constructed and the additional impervious surface, as well as the impact on the landmark trees. The parking and display area on the southern half of the site will be moved 32 feet closer to State Street than currently exists. While still remaining behind the required front setback (15 feet), a variance is required to provide tandem parking in this location. Staff does not support the granting of a variance for the expansion of this parking area.

Staff acknowledges that the area in the rear functions differently than a typical parking lot and in general would support reduced aisle widths and tandem parking, consistent with past ZBA approvals of similar requests for this site. However, staff encourages the petitioner to take additional steps to reduce impervious surface and/or provide alternative methods that would allow for an increase of car storage while reducing the expansion of paving.

Natural Resources (Landscaping) – Staff does not support the requested landscape modification or variances as proposed. The petitioner has not provided significant justification to satisfy the standards for impact to the landmark trees. Staff acknowledges that the car storage area in the rear of the site functions differently than a typical parking lot, however the intent of landscape islands is more than just aesthetic or pedestrian value. Landscape islands are intended to reduce the impervious surface, assist in storm water function and help reduce the heat island effect of large paved surfaces.

Malletts Creek Coordinating Committee (MCCC) – The MCCC met in early October to discuss the project and offered the following recommendations:

In the process of recognizing the Malletts Creek Restoration Plan, April 2000, on October 3, 2000 the City Planning Commission specifically resolved to minimize impervious area within the Malletts Creek watershed. This development proposal and the requested variance to exceed the parking maximums in Chapter 59 are in direct opposition of the recommendation of the Malletts Creek Restoration Plan and the City Planning Commission resolution. The Malletts Creek Coordinating Committee (MCCC) is not supportive of the request for a variance from the Landscape Ordinance (Chapter 62), requirement to have landscape islands every 15 spaces. Varying from this requirement will result in more impervious area, and thus more runoff will be contributed to Malletts Creek.

The Malletts Creek Coordinating Committee (MCCC) is not supportive of the request for a variance from the Landscape Ordinance (Chapter 62), requirement to have depressed bioswales within the interior landscaping of the parking lot. The purpose of this requirement is partially storm water quality driven. The variance could possibly be justified and/or mitigated if the petitioner provided a similar amount of storm water management throughout the site in the form of green roofs, sand filters, level spreaders, or other low impact development techniques.

PREVIOUS VARIANCES:
 1. DECEMBER 20, 2000 - GRANTED A VARIANCE FROM THE OFF-STREET PARKING ORDINANCE TO ALLOW THE EAST PARKING AREA (AUTO STORAGE) TO HAVE (1) STACKED PARKING, (2) 20-FT. AISLE-WAYS AND (3) 8-FT. X 16-FT. SPACES FOR THE STORAGE OF AUTOMOBILES. (1) IN THE CASE OF STACKED PARKING, A VARIANCE TO ALLOW 114 STACKED SPACES. (2) IN THE CASE OF 20-FT. AISLE-WAYS, A VARIANCE OF 4-FT. FROM THE 24-FT. AISLE-WAY TO ALLOW 20-FT. AISLE-WAYS IN THIS STORAGE AREA. (3) IN THE CASE OF SPACE SIZE, A VARIANCE OF 28% FROM THE 30% PERMITTED SMALL CAR SPACES TO ALLOW 58% OF PARKING TO BE SMALL CAR, MANY WITHIN THIS STORAGE AREA.
 2. AUGUST 27, 2003 - GRANTED A VARIANCE OF 1 FT. FROM THE 9 FT. PARKING STALL WIDTH, 2 FT. FROM THE PARKING AISLE WIDTH AND TO ALLOW STACKED PARKING PER SITE PLAN FOR THIS AUTOMOBILE SALES STORAGE AREA.
 3. MAY 25, 2005 - GRANTED A VARIANCE FROM THE REQUIRED FRONT YARD SETBACK TO ALLOW STACKED PARKING AT A LOCATION WHERE IT REQUIRES A VARIANCE OF 20.2 FEET FROM THE OAKBROOK SETBACK WHERE 52.7 FEET WOULD BE REQUIRED. THE VARIANCE IS GRANTED FOR 13 PARKING SPACES IN THE FRONT SETBACK THAT DID PREVIOUSLY EXIST. POROUS PAVERS WILL BE USED IN THE ENTIRE FRONT STACKED AREA.

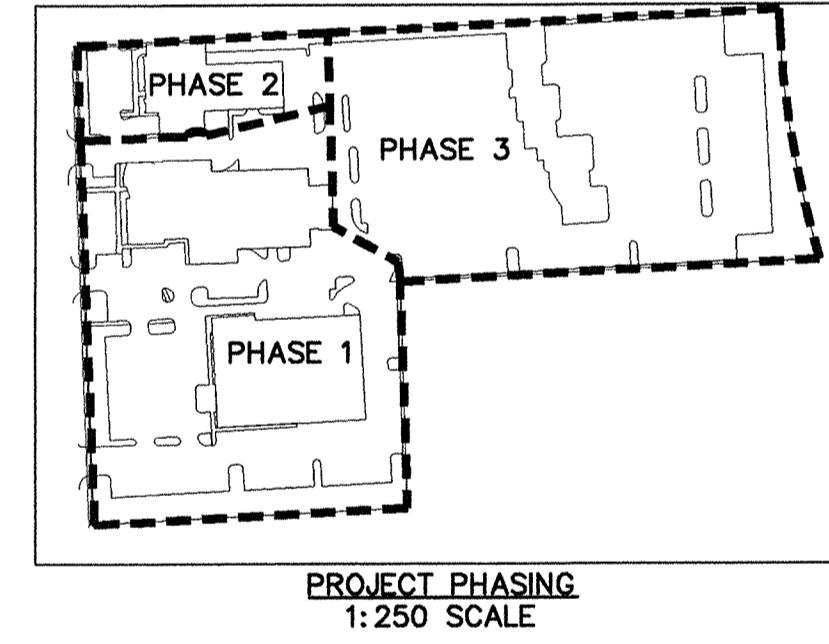

- PROPOSED VARIANCES:
 1. ADD 305 ADDITIONAL 8-FT X 16-FT VEHICLE PARKING SPACES IN STORAGE AREA.
 2. ALLOW STACKED PARKING PER THIS SITE PLAN FOR AUTOMOBILE STORAGE.
 3. ALLOW GREATER THAN 15 CONTIGUOUS PARKING SPACES WITHOUT A LANDSCAPE ISLAND IN VEHICLE STORAGE AREA.
 4. ALLOW GREATER THAN 30% SMALL CAR SPACES IN SALES AREA OF SITE

BUILDING NOTE:
 THERE ARE NO FIREWALLS INSIDE ANY OF THE EXISTING OR PROPOSED BUILDINGS.
 NOTE:
 AN ENGINEER SHALL INSPECT THE DETENTION FACILITY AND PREPARE A REPORT OF RECOMMENDED MAINTENANCE, AND THAT WORK SHALL BE COMPLETED AS PART OF THE SITE IMPROVEMENTS.

PER CHAPTER 49, SECTION 4-5B OF THE CITY CODE, ALL SIDEWALKS ARE TO BE KEPT AND MAINTAINED IN GOOD REPAIR BY THE OWNER OF THE LAND ADJACENT TO AND ABUTTING THE SAME. PRIOR TO THE ISSUANCE OF THE FINAL CERTIFICATE OF OCCUPANCY FOR THIS SITE, ALL EXISTING SIDEWALKS IN NEED OF REPAIR MUST BE REPAIRED IN ACCORDANCE WITH CITY STANDARDS.

TRAFFIC IMPACT:
 THE PROJECT WILL GENERATE THE FOLLOWING TRAFFIC
 AM PEAK = 11 ENTER / 9 EXIT = 20 TOTAL
 PM PEAK = 18 ENTER / 28 EXIT = 46 TOTAL

ALL PROPOSED PAVEMENT EDGES ARE TO BE MOUNTABLE MODIFIED D2 CURB. THIS APPLIES TO THE PRIVATE PROPERTY ONLY.

SITE PLAN

GERMAIN OF ANN ARBOR CAMPUS IMPROVEMENTS

A PART OF THE SOUTHWEST 1/4 SECTION 4, T2S, R6E,
CITY OF ANN ARBOR, WASHTENAW COUNTY, MICHIGAN

COMMUNITY IMPACT

- THE PROPOSED IMPROVEMENTS TO THE SITE WILL HAVE MINIMAL IMPACT ON THE NEIGHBORS AND OVERALL COMMUNITY.
- AS IT IS NOT A HOUSING PROJECT, THERE WILL BE NO IMPACT ON AREA SCHOOLS.
 - THE ENTRIES ARE NOT CHANGING SIGNIFICANTLY AND THERE IS PROJECTED TO BE 20 ADDITIONAL AM PEAK TRIPS AND 46 ADDITIONAL PM PEAK TRIPS AS A RESULT OF THIS PROJECT. INCREASE IN TRAFFIC (VEHICLE STORAGE AREAS HAVE NO EFFECT ON TRAFFIC GENERATION).
 - THE ADDITIONAL VEHICLE STORAGE AREAS WILL BE SCREENED BY LANDSCAPING.
 - THE EXISTING STORM WATER DETENTION POND HAS SUFFICIENT CAPACITY TO HANDLE THE PROPOSED NEW IMPERVIOUS SURFACE WITH NO CHANGES SO RUNOFF WILL NOT NEGATIVELY IMPACT THE NEIGHBORS OR OUTLET.
 - THE BUILDING APPEARANCE AND LANDSCAPING ALONG STATE STREET WILL BE IMPROVED TO BENEFIT PASSERSBY.
 - NEW BENCHES WILL BE LOCATED ALONG STATE STREET FOR PEDESTRIAN USE.
 - THERE ARE NO HISTORIC FEATURES ON THE PROPERTY SO THERE WILL BE NO NEGATIVE ARCHAEOLOGICAL IMPACTS FROM THE DEVELOPMENT.
 - THE ONLY NEGATIVE IMPACTS ON NATURAL FEATURES WILL BE TWO LANDMARK BOXELDER TREES THAT WILL BE REMOVED, AND SOME MAN-CREATED STEEP SLOPES WILL BE IMPACTED BY EXPANSION OF THE PARKING AREAS.

CONSTRUCTION NOTES

- ALL WORK ON THIS SITE WILL BE IN ACCORDANCE WITH ALL APPLICABLE CURRENT STANDARDS & SPECIFICATIONS OF THE CITY OF ANN ARBOR EXCEPT AS HEREIN MODIFIED.
- IT IS ESSENTIAL THAT THE CONTRACTOR FAMILIARIZE HIMSELF WITH THE SITE PRIOR TO SUBMITTING PROPOSAL.
- IT SHALL BE THE CONTRACTORS RESPONSIBILITY TO VERIFY AND/OR OBTAIN ANY INFORMATION NECESSARY REGARDING THE PRESENCE OF UNDERGROUND UTILITIES WHICH MIGHT AFFECT THIS JOB.
- CONTRACTOR SHALL BE RESPONSIBLE FOR DAMAGE TO AND THE REPAIR OF ANY EXISTING UTILITY LINE IN THE CONSTRUCTION ZONE.
- AT LEAST 72 HOURS PRIOR TO ANY EXCAVATION, THE CONTRACTOR SHALL CALL "MISS DIG" (1-800-482-7171) FOR UTILITY LOCATIONS.
- LOCATION OF EXISTING UTILITIES WERE TAKEN FROM EXISTING PLANS. LOCATIONS WERE FIELD VERIFIED WHERE POSSIBLE.
- CONTRACTOR MUST OBTAIN AN EROSION CONTROL PERMIT FROM THE CITY OF ANN ARBOR PRIOR TO BEGINNING EARTH MOVING. CONTRACTOR WILL BE RESPONSIBLE FOR OBTAINING ALL NECESSARY PERMITS PRIOR TO BEGINNING CONSTRUCTION.
- CONTRACTOR SHALL BE RESPONSIBLE FOR INSTALLATION, MAINTENANCE AND REMOVAL OF ALL TEMPORARY EROSION CONTROL MEASURES PER THIS APPROVED PLAN.
- ANY CONDITIONS EXISTING ON THE SITE THAT ARE NOT CONSISTENT WITH THE PLANS OR SOIL EROSION SEDIMENTATION PERMIT WILL RESULT IN A STOP WORK ORDER AND REVOCATION OF THE SOIL EROSION SEDIMENTATION CONTROL PERMIT.
- ALL FILL MATERIAL MUST BE PLACED IN LIFTS NOT EXCEEDING 12 INCHES AND COMPACTED TO 95% OF THE MAXIMUM UNIT WEIGHT.
- THE CONTRACTOR WILL BE REQUIRED TO PROOF ROLL (WITH A HEAVY RUBBER Tired VEHICLE) ALL FILL AREAS PRIOR TO PLACING ADDITIONAL FILL AND ALL CUT AREAS UPON COMPLETION OF THE CUT AND PRIOR TO PLACING SUBBASE MATERIAL. IF THE PROOF ROLLING INDICATES UNSTABLE AREAS THE UNSTABLE MATERIAL MUST BE REMOVED AND REPLACED WITH MATERIAL MATCHING THE ADJACENT SOILS TO THE ELEVATION OF THE SUB-GRADE.
- THE FINISHED SUBGRADE MUST BE GRADED WITHIN A TOLERANCE OF ± 0.1 FEET OF DESIGN GRADE COMPACTED TO NOT LESS THAN 95% OF THE MAXIMUM UNIT WEIGHT TO A DEPTH OF 9 INCHES AND APPROVED BY THE OWNERS REPRESENTATIVE PRIOR TO PLACEMENT OF THE SUBBASE.
- THE FINISHED SUBBASE MUST BE GRADED WITHIN A TOLERANCE OF ± 3/4 INCH OF THE DESIGN GRADE AND APPROVED BY THE OWNERS REPRESENTATIVE PRIOR TO PLACEMENT OF THE AGGREGATE BASE. FINE GRADING PRIOR TO THE PLACEMENT OF THE AGGREGATE BASE MATERIAL SHALL BE INCLUDED IN THE COST OF FURNISHING AND PLACING THE SUBBASE.
- THE WORK OF CONSTRUCTING ON AGGREGATE BASE COURSE SHALL CONFORM TO MDT SPECIFICATION 3.01 EXCEPT THAT FINE GRADING PRIOR TO PLACEMENT OF OF THE BITUMINOUS SURFACING SHALL BE INCLUDED IN THE COST OF FURNISHING AND PLACING THE AGGREGATE BASE.
- ALL PAVEMENT GRADES SHOWN REPRESENT TOP OF PAVEMENT AND EDGE OF METAL UNLESS OTHERWISE NOTED.
- ALL CONSTRUCTION TRAFFIC CONTROL SHALL BE SIGNED PER THE MANUAL OF UNIFORM TRAFFIC CONTROL DEVICES. CONTRACTOR SHALL MAINTAIN ACCESS FOR EMERGENCY VEHICLES AT ALL TIMES.

CIVIL ENGINEER / PETITIONER

STATEMENT OF INTEREST IN THE LAND

ALL LAND ENCOMPASSED IN THE SCOPE OF THIS SUBMITTAL IS WITHIN THE PROPERTY LINES OF THE CURRENT SITE AND WILL REMAIN UNDER THE SAME OWNERSHIP. THE PROPOSED BUILDING REMODELS AND INCREASED PARKING ON SITE WILL FURTHER STREAMLINE ALL BUSINESS PROCESSES RESULTING IN AN ENHANCED CUSTOMER EXPERIENCE THAT WILL GENERATE MORE REVENUE FOR THE BUSINESS AND THE CITY OF ANN ARBOR.

DEVELOPMENT PROGRAM

THE SITE IS AN EXISTING AUTOMOBILE SALES AND SERVICE DEALERSHIP, SERVING FOUR DIFFERENT AUTOMAKERS - AUDI, HONDA, PORSCHE AND VOLKSWAGEN. THIS PROJECT PROPOSES THE EXPANSION AND REMODELING OF TWO OF THE THREE BUILDINGS ON THE SITE (6,429 SF EXPANSION OF THE PORSCHE/AUDI BUILDING AND 4,877 SF EXPANSION OF THE VOLKSWAGEN BUILDING). IT ALSO INCLUDES THE EXPANSION OF THE CUSTOMER AND EMPLOYEE PARKING AND AUTOMOBILE INVENTORY EXTERIOR DISPLAY AND STORAGE ON THE SITE. THESE ARE NEEDED TO MAINTAIN AND UPGRADE THE QUALITY OF THE SITE'S FACILITIES, ENHANCE THE CUSTOMER EXPERIENCE, AND MEET THE REQUIREMENTS OF THE AUTOMOBILE MANUFACTURERS REPRESENTED BY GERMAIN.

THE EXPANSIONS WILL NOT REQUIRE ANY MODIFICATION TO THE STORM WATER DETENTION FACILITIES OR THE WETLAND MITIGATION AREA ON THE EAST SIDE OF BOARDWALK SO NO CHANGES OF ANY KIND ARE PROPOSED IN THAT AREA.

THE PROJECT WILL BE COMPLETED IN THREE PHASES. A DIAGRAM OF THOSE PHASES CAN BE FOUND ON SHEET #5 (SITE PLAN).

LANDSCAPING ALONG STATE STREET WILL BE SIGNIFICANTLY ENHANCED TO PROVIDE AN ATTRACTIVE VIEW FOR PASSERSBY ON STATE STREET AND WILL ALSO PROVIDE BENCHES ALONG THE STATE STREET SIDEWALK FOR PEDESTRIAN USE. DUE TO DIFFICULT SLOPE AND SOIL CONDITIONS IN THE LARGE INTERIOR ISLAND, A REQUEST FOR MODIFICATION FROM THE LANDSCAPE REQUIREMENTS WILL BE PART OF THIS APPLICATION FOR SOME OF THE REQUIRED INTERIOR LANDSCAPE TREES THAT CAN'T BE PLANTED.

IT IS ANTICIPATED THAT THE PROJECT WILL COST APPROXIMATELY \$5,475,000.

NATURAL FEATURES ASSESSMENT
Public Interest in Project (per Zoning Ordinance, Chapter 55:5:31)
The applicant's property consists of one 9.78 acre parcel west of Boardwalk Drive and a 2.59 acre parcel east of Boardwalk. The only impact projected for the area east of Boardwalk is a small amount of additional water in the storm water detention pond from the increased impervious surface planned for the current project. No actual construction will be performed in this area, so no disturbance is projected. It holds the site's storm water detention pond fronting Boardwalk, and a wetland behind it, part of which was built as part of a wetland mitigation created with the construction of the Howard Cooper Honda building in 2003. The wetland and storm water detention pond are mostly open in character, with herbaceous material such as cattails, grasses, sedges, rushes and forbs dominating. Small shrubs such as dogwood, ninebark and buckhorn are also found on the site, as are some canopy trees some of which were planted as part of the mitigation.

PROJECTED IMPACTS:
The large central island in the center of the property contains a slope which was made steeper with fill when the upper lot was originally created. It is populated by small, scrubby trees (boxelders, black locusts, buckthorn, etc.). New parking supported by a retaining wall is proposed for the lots west and east of (above and below) this area on the north edge of the parking lots. Existing trees to remain will be protected by tree fencing. The only additional proposed impact to this area is some additional tree plantings on the upper and lower edges of the area to help meet the interior landscaping requirements.

NATURAL FEATURES PROTECTION/MITIGATION
A steep (non-natural) slope on the north side of the property will be impacted by the expansion of the northern building and vehicle storage parking behind it. Most of the trees on that slope that will be removed for the expansion are non-landmark-sized volunteers but there are three multi-stem boxelders (*Acer negundo*) that have a total equivalent dbh of 52.8in. Landscape trees along the Honda dealership's State Street, Boardwalk and Oak Brook Street parking lots will also be removed with the expansion of those lots. New trees will be planted to replace them. Retaining walls will be built on the steep slopes to support the additional parking. Those walls will be "living walls" which allow for plants to be planted within the wall to provide a more aesthetic appearance.

ALTERNATIVES CONSIDERED TO MINIMIZE IMPACTS
The primary source of impact on the site's natural features is the expansion of the parking lots for storage of vehicles. In order to gain the number of parking spaces provided by this plan, a parking deck would have to be built. To provide the number of spaces proposed for this project, a three story structure with a footprint of approximately 75,000 square feet (shown on this plan) would be required. The cost of a parking deck would be approximately \$18,000 per space (source: <http://www.reedconstructiondata.com/rsmcsm/models/garage/>), which is far beyond the available budget for this project. As a result, this option was not considered as viable.

REVISIONS - 10-22-2013 PER CITY, 10-28-2013 PER CITY, 11-5-2013 PER CITY

SCALE
0 30 60 120
SCALE: 1"=60'

PREPARED BY: Robert J. Wanty, P.E., MICH No. 28666

Public Interest in Project (per Zoning Ordinance, Chapter 55:5:31)
a. The relative extent of the public and private need for the proposed activity. The primary public benefit of the proposed project will be continued, convenient access to an automobile dealership campus that has been serving the Ann Arbor area for over 48 years. The project is intended to increase the selection and stock of cars that the general public may purchase from with minimal impact to valuable natural features.

b. The availability of feasible and prudent alternative locations and methods to accomplish the expected benefit from the activity. The proposed activity is restricted to the dealership's current location for reasons ranging from customer convenience to inventory security. Increased storage capacity for vehicle inventory is recommended by the four automobile manufacturers represented by Germain of Ann Arbor. In order to meet this demand, expanded areas for vehicle storage is required, and there is no room on-site besides the edges of the existing parking lots. As alternatives to expanding the existing lots into greenspace, either an expensive parking structure would be required to handle the required additional inventory, or an off-site storage area would be required. The latter option would be difficult logistically because drivers and inventory would constantly need to be shuttled between the existing facilities and the satellite location, wherever that might be. Currently employees can walk to the inventory area, saving time and gasoline. Expanding into the parcel across Boardwalk is not possible because it is almost entirely occupied by the dealership's storm water detention pond and an MDEQ-required wetland mitigation area.

c. The extent and permanence of the beneficial or detrimental effects which the proposed activity may have on the public and private use to which the area is suited, including the benefits the natural and/or natural feature open space provides. The open space in question is entirely on the applicant's private property, there is currently no public use of the area. The areas that will be converted are either existing parking, lawn areas or areas of artificial steep slopes created with fill material that are populated by volunteer trees with varying value to wildlife. The main benefit provided to the public by these areas is screening from the parking lot, and that will be replaced by new plantings and vegetated retaining walls. The proposed changes will be permanent.

d. The probable impact of the activity in relation to the cumulative effect created by other existing and anticipated activities in or near the natural feature to be protected. The natural features that would be most impacted by this project are basically artificially-steepened slopes and some volunteer trees, mostly boxelders on the north edge of the site. The probable impact would be to fill some of the slopes and build retaining walls to support the increased vehicle storage areas. This impact basically continues a process begun years ago of changing the existing natural slope downhill from State Street toward the railroad tracks. The natural condition of the areas to be converted is poor.

e. The probable impact on recognized historical, cultural, scenic, ecological or recreational values, and on fish, wildlife and public health. The slopes and trees areas that will be most impacted by the proposed activity have little ecological value. The slopes are covered by volunteer black locust, buckthorn, boxelder and other trees and shrubs with low ecological value. Due to the poor soil and heavy shade there is little to no groundcover vegetation. There are no historical, cultural, scenic, ecological or recreational values on the site where development activity is proposed. The existing storm water detention pond is large enough to handle all of the proposed new impervious surface, so plants and animals depending on the storm water detention pond or adjacent wetland would also not be negatively impacted by this project.

a. The size and quantity of the natural feature open space being considered. The contiguous area of slopes and treed areas that will be most impacted by the proposed activity occupy approximately 36,000 square feet of the site. The other areas to be impacted are landscaped open area within the site or along Boardwalk.

b. The amount and quantity of the remaining natural feature open space. Approximately 22,000 square feet of slopes and treed areas will remain after the development.

c. Proximity of the proposed activity in relation to the natural feature, taking into consideration the degree of slope, soil type and the nature of the feature to be protected. The proposed expansion of the northern (Volkswagen) building and the northern and eastern edges of the storage lots will encroach into the areas of steep slopes. As mentioned above, the underlying soils are Morley loam but there is a large amount of poor fill material on top of that, which was placed with the original creation of the storage areas and created the steep slopes.

d. Economic value, both public and private, of the proposed activity and economic value, both public and private, if the activity were not permitted. The economic value of this project is primarily private, although as noted before, it will allow the dealerships to provide continued convenient service to the Ann Arbor community in its current location in the most efficient manner. Should the activity not be permitted, either the dealerships would not be able to provide the optimal inventory, or a less efficient, satellite site for storage of inventory would be required to provide the recommended levels of inventory.

SHEET 4

PREVIOUS VARIANCES:
 1. DECEMBER 20, 2000 - GRANTED A VARIANCE FROM THE OFF-STREET PARKING ORDINANCE TO ALLOW THE EAST PARKING AREA (AUTO STORAGE) TO HAVE (1) STACKED PARKING, (2) 20-FT. AISLE-WAYS AND (3) 8-FT. X 16-FT. SPACES FOR THE STORAGE OF AUTOMOBILES. (1) IN THE CASE OF STACKED PARKING, A VARIANCE TO ALLOW 114 STACKED SPACES. (2) IN THE CASE OF 20-FT. AISLE-WAYS, A VARIANCE OF 4-FT. FROM THE 24-FT. AISLE-WAY TO ALLOW 20-FT. AISLE-WAYS IN THIS STORAGE AREA. (3) IN THE CASE OF SPACE SIZE, A VARIANCE OF 28% FROM THE 30% PERMITTED SMALL CAR SPACES TO ALLOW 58% OF PARKING TO BE SMALL CAR, MANY WITHIN THIS STORAGE AREA.
 2. AUGUST 27, 2003 - GRANTED A VARIANCE OF 1 FT. FROM THE 9 FT. PARKING STALL WIDTH, 2 FT. FROM THE PARKING AISLE WIDTH AND TO ALLOW STACKED PARKING PER SITE PLAN FOR THIS AUTOMOBILE SALES STORAGE AREA.
 3. MAY 25, 2005 - GRANTED A VARIANCE FROM THE REQUIRED FRONT YARD SETBACK TO ALLOW STACKED PARKING AT A LOCATION WHERE IT REQUIRES A VARIANCE OF 20.2 FEET FROM THE OAKBROOK SETBACK WHERE 52.7 FEET WOULD BE REQUIRED. THE VARIANCE IS GRANTED FOR 13 PARKING SPACES IN THE FRONT SETBACK THAT DID PREVIOUSLY EXIST. POROUS PAVERS WILL BE USED IN THE ENTIRE FRONT STACKED AREA.

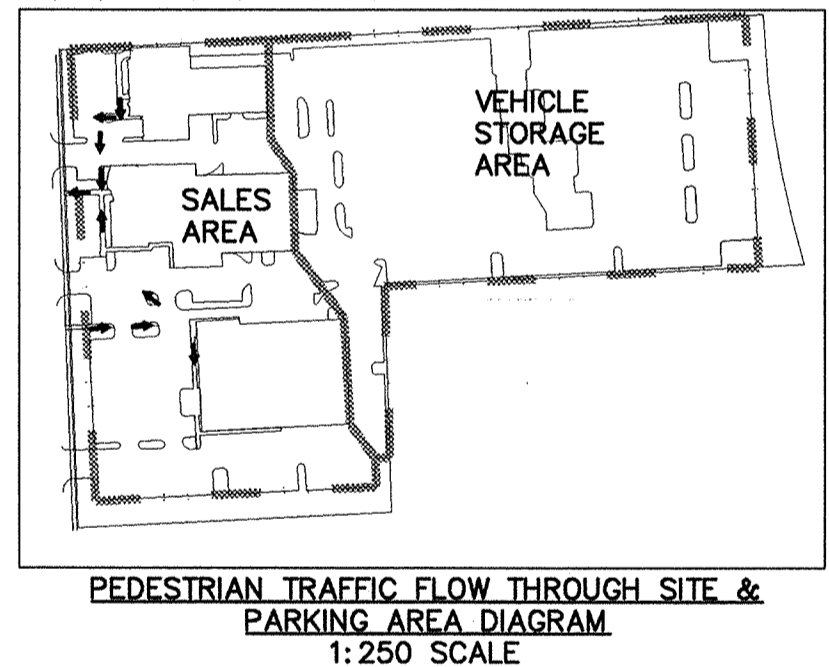

- PROPOSED VARIANCES:
 1. ADD 305 ADDITIONAL 8-FT X 16-FT VEHICLE PARKING SPACES IN STORAGE AREA.
 2. ALLOW STACKED PARKING PER THIS SITE PLAN FOR AUTOMOBILE STORAGE.
 3. ALLOW GREATER THAN 15 CONTIGUOUS PARKING SPACES WITHOUT A LANDSCAPE ISLAND IN VEHICLE STORAGE AREA.
 4. ALLOW GREATER THAN 30% SMALL CAR SPACES IN SALES AREA OF SITE

BUILDING NOTE:
 THERE ARE NO FIREWALLS INSIDE ANY OF THE EXISTING OR PROPOSED BUILDINGS.
 NOTE:
 AN ENGINEER SHALL INSPECT THE DETENTION FACILITY AND PREPARE A REPORT OF RECOMMENDED MAINTENANCE, AND THAT WORK SHALL BE COMPLETED AS PART OF THE SITE IMPROVEMENTS.

PER CHAPTER 49, SECTION 4-5B OF THE CITY CODE, ALL SIDEWALKS ARE TO BE KEPT AND MAINTAINED IN GOOD REPAIR BY THE OWNER OF THE LAND ADJACENT TO AND ABUTTING THE SAME. PRIOR TO THE ISSUANCE OF THE FINAL CERTIFICATE OF OCCUPANCY FOR THIS SITE, ALL EXISTING SIDEWALKS IN NEED OF REPAIR MUST BE REPAIRED IN ACCORDANCE WITH CITY STANDARDS.

TRAFFIC IMPACT:
 THE PROJECT WILL GENERATE THE FOLLOWING TRAFFIC
 AM PEAK = 11 ENTER / 9 EXIT = 20 TOTAL
 PM PEAK = 18 ENTER / 28 EXIT = 46 TOTAL

ALL PROPOSED PAVEMENT EDGES ARE TO BE MOUNTABLE MODIFIED D2 CURB. THIS APPLIES TO THE PRIVATE PROPERTY ONLY.

SOIL EROSION AND SEDIMENTATION CONTROL NOTES GENERAL

- The contractor shall implement and maintain the soil erosion control measures as shown on the plans at all times during construction on this project. Any modifications or additions to the soil erosion control measures due to construction or changed conditions, shall be complied with as required or directed by the Owner, Project Engineer or the City of Ann Arbor.
- All soil erosion and sedimentation control work shall conform to the permit requirements of the City of Ann Arbor and the laws of the State of Michigan.
- A NPDES Construction Activity Permit is required for all sites with soil disturbance greater than 5 acres.
- Daily inspections shall be made by the Contractor. Periodic inspections may be made by the Owner/Project Engineer/Township to determine the effectiveness of erosion and sedimentation control measures. Any necessary corrections shall be made without delay.
- Erosion and sedimentation from work on the site shall be contained on the site and not be allowed to collect on any off-site areas or in waterways.
- All mud/dirt tracked onto roads from the site due to construction, shall be promptly removed by the Contractor. External streets will be cleaned of any tracked mud immediately following each mud-tracking occurrence.
- Restoration of all disturbed areas, including placement of topsoil, seed, fertilizer and mulch and/or sod shall be done within 15 days of the completion of final grade.
- Construction operations shall be scheduled and performed so that preventive soil erosion control measures are in place prior to excavation in critical areas and temporary stabilization measures are in place immediately following backfilling operations.
- Special precautions will be taken in the use of construction equipment to prevent situations that promote erosion.
- Proper dust control shall be maintained during construction by use of water trucks and/or chloride as required.
- The Contractor shall be responsible for maintaining all temporary soil erosion control measures and removal of some upon authorized completion of project. Completion of project will not be authorized until all site work, home building, road work and utility construction is complete and all soils are stabilized.

CONSTRUCTION SEQUENCE

- JAN. 17, 2014 - SOIL EROSION AND SEDIMENTATION CONTROL PRE-GRADING MEETING
- PHASE 1
 - JAN. 20, 2014 - INSTALL SILT FENCE, INLET FILTERS
 - JAN. 22, 2014 - REMOVE PAVEMENT, WALKS, CURB, LIGHTS
 - FEB. 3, 2014 - PLACE STABILIZED CONSTRUCTION ACCESS
 - FEB. 4, 2014 - GRADE SITE TO BOTTOM OF STONE & EXCAVATE FOR BUILDING
 - FEB. 10, 2014 - INSTALL BUILDING FOOTINGS AND START BUILDING CONSTRUCTION
 - FEB. 17, 2014 - PLACE CURB AND PAVEMENT
 - FEB. 24, 2014 - INSTALL LIGHTS, LANDSCAPING, SEED AND MULCH
 - MAR. 3, 2014 - REMOVE SEDIMENT FROM STORM WATER MANAGEMENT SYSTEM
 - MAR. 4, 2014 - REMOVE ALL TEMPORARY SOIL EROSION CONTROL MEASURES
- PHASE 2
 - MAR. 5, 2014 - INSTALL SILT FENCE, INLET FILTERS
 - MAR. 10, 2014 - REMOVE PAVEMENT, WALKS, CURB, LIGHTS
 - MAR. 17, 2014 - PLACE STABILIZED CONSTRUCTION ACCESS
 - MAR. 18, 2014 - GRADE SITE TO BOTTOM OF STONE & EXCAVATE FOR BUILDING
 - MAR. 24, 2014 - INSTALL BUILDING FOOTINGS AND START BUILDING CONSTRUCTION
 - MAR. 31, 2014 - PLACE CURB AND PAVEMENT
 - APR. 6, 2014 - INSTALL LIGHTS, LANDSCAPING, SEED AND MULCH
 - APR. 13, 2014 - REMOVE SEDIMENT FROM STORM WATER MANAGEMENT SYSTEM
 - APR. 14, 2014 - REMOVE ALL TEMPORARY SOIL EROSION CONTROL MEASURES
- PHASE 3
 - APR. 15, 2014 - INSTALL SILT FENCE, INLET FILTERS
 - APR. 16, 2014 - REMOVE PAVEMENT, WALKS, CURB, LIGHTS
 - APR. 23, 2014 - GRADE SITE TO BOTTOM OF STONE AND INSTALL LIVING WALL SYSTEM.
 - MAY 19, 2014 - PLACE CURB AND PAVEMENT
 - MAY 26, 2014 - INSTALL LIGHTS, LANDSCAPING, SEED AND MULCH
 - JUNE 2, 2014 - REMOVE SEDIMENT FROM STORM WATER MANAGEMENT SYSTEM
 - JUNE 3, 2014 - REMOVE ALL TEMPORARY SOIL EROSION CONTROL MEASURES

CONSTRUCTION SEQUENCE NOTES:

- HYDRANTS PROVIDING PROTECTION COVERAGE FOR THE BUILDINGS SHALL BE IN SERVICE AND APPROVED BY BOTH ENGINEERING AND FIRE DEPARTMENT BEFORE FIRE DEPARTMENT WILL SUPPORT PERMIT ISSUANCE FOR NEW CONSTRUCTION PHASE AND BEFORE COMBUSTIBLE MATERIAL ARE PLACED ON THE JOB SITE.
- STORAGE AREA FOR CONSTRUCTION MATERIALS SHALL NOT INTERFERE WITH FIRE/EMERGENCY SITE ACCESS.
- IF SITE ACCESS IS TO BE RESTRICTED DURING CONSTRUCTION, A KNOX BOX LOOK FOR THE GATE IS TO BE PROVIDED. ANY OTHER MEANS MUST BE APPROVED BY THE FIRE MARSHALL.

PORTABLE CONCRETE WASHOUT CONTAINER

CONCRETE WASHOUT SYSTEMS
PO Box 2804
Carmichael, CA 95609
Phone: 1.877.232.7468
Fax: 1.916.244.0403
info@concretewashout.com
www.concretewashout.com
Patent Pending

DESCRIPTION
A portable, self-contained and watertight container affixed with ramps that controls, captures and contains caustic concrete wastewater and washout material.

PURPOSE & OBJECTIVE
Allows trade personnel to easily washout concrete trucks, pumps and other equipment associated with cement on site and allows easy off site recycling of the same concrete materials and wastewater.

APPLICATION
Construction projects where concrete, stucco, mortar, grout and cement are used as a construction material or where cementitious wastewater is created.

MAINTENANCE
Inspect and clean out when 3/4 full, not allowing the container to overflow.
Inspect wastewater level and request a vacuum if needed.
Inspect subcontractors to ensure that proper housekeeping measures are employed when washing out equipment.

SPECIFICATIONS
The container must be portable and temporary, watertight, equipped with ramps and have a holding capacity to accept washout from approximately 350 yards of poured concrete. A vacuum service must accompany washout container and be used by site superintendent as needed. A rampless container may be used in conjunction with a ramped container or by itself if a concrete pump is not needed. The washwater must be disposed of or treated and recycled in an environmentally safe manner and in accordance with federal, state or local regulatory guidelines.

TARGETED POLLUTANTS
Caustic wastewater (high pH level near 12 units)
Suspended solids
Assorted Metals; Chromium VI, Nickel, Sulfate, Potassium, Magnesium and Calcium Compounds

THE UNDERGROUND UTILITIES SHOWN HAVE BEEN LOCATED FROM FIELD SURVEY INFORMATION AND EXISTING RECORDS. THE SURVEYOR MAKES NO GUARANTEES THAT THE UNDERGROUND UTILITIES SHOWN COMPARE TO THE ACTUAL UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. THE SURVEYOR DOES NOT WARRANT THAT THE UTILITIES SHOWN ARE COMPLETELY ACCURATE OR COMPLETELY AVAILABLE. THE SURVEYOR HAS NOT PHYSICALLY LOCATED THE UNDERGROUND UTILITIES.

CONSTRUCTION SHALL BE MADE WITHOUT PRIOR WRITTEN CONSENT OF WASHTENAW ENGINEERING COMPANY, INC.

THE OWNER SHALL NOT USE OR MISUSE ANY OTHER PERSON TO USE THE DRAWINGS, SPECIFICATIONS, ELECTRONIC DATA, AND OTHER INSTRUMENTS OF SERVICE ON OTHER PROJECTS. FOR ADDITION TO THIS PROJECT OR FOR COMPLETION OF THIS AGREEMENT, OTHERS SO LONG AS WASHTENAW ENGINEERING COMPANY (WECO) IS NOT ADVISED TO BE IN DEFAULT UNDER THIS AGREEMENT. THE OWNER SHALL INDEMNIFY AND HOLD HARMLESS WECO, WECO'S CONSULTANTS AND EMPLOYEES OF ANY OF THEM FROM AND AGAINST CLAIMS, DAMAGES, LOSSES AND EXPENSES, INCLUDING BUT NOT LIMITED TO ATTORNEY'S FEES, ARISING OUT OF UNAUTHORIZED REUSE OF DRAWINGS, SPECIFICATIONS, ELECTRONIC DATA OR OTHER INSTRUMENTS OF SERVICE.

DETENTION BASIN CALCULATIONS
PROJECT NAME: Germain Ann Arbor
Date: 2013-08-19

DRAINAGE AREA CALCULATIONS

Area (acre)	C	A/C
Water	0.70	1.00
Buildings	1.58	0.95
Sidewalk/Roads	6.28	0.95
Gravel	0.00	0.85
Lawn	2.22	0.24
Total	10.58	0.84

100 YEAR FLOOD VOLUME STORAGE CALCULATION

Calculate Q₀ = Q₀(A/C)
Q₀ = 0.17912 cfs (100-yr event)
T = 25 + (10312.5/Q₀)^{0.5}
T = 214.84 min
Calculate Storage Volume Per Acre of Impervious
V₀ = (18500)(T)(1.25) - 40(Q₀T)^{0.5}
V₀ = 13241 cfs (100-yr event)
Calculate Total Volume of Storage Required for 100 Year Storm
V_T = V₀A/C
V_T = 117311 cft

CALCULATE BANKFULL FLOOD VOLUME: Based on 24 hour, 1.5 year storm event (I = 2.26 in/hr)
V_B = (2.25)(1/12)(43560 sf)(A/C)
V_B = 72362 cft

CALCULATE FIRST FLUSH VOLUME
First flush volume (V_{FF}) = 5 in rain over entire watershed
V_{FF} = (0.5)(1/12)(43560 sf)(A/C)
V_{FF} = 16030 cft

STORAGE ANALYSIS

Elevation	Pond Area		Additional Pond Area		Cumulative	
	Area A	Vol A (cft)	Area B	Vol B (cft)	Vol A+B (cft)	Vol (cft)
824	0.00	0	0	0	0	117680
824	0.00	0	0	0	0	117680
824	0.00	0	0	0	0	117680
824	34384.36	33391	0	0	33391	117680
823	23293.99	31393	0	0	31393	84289
822	30387.25	29364	0	0	29364	52896
821	28341.02	23522	0	0	23522	23522
820	18723.19	0	0	0	0	0

TOTAL VOLUME (A+B) = 117680 CF
Storage Elev Calc: First Flush (Xff) = 823.99
Storage Elev Calc: 100 Year (X100) = 823.99

OUTLET CONTROL STRUCTURE DESIGN
FIRST FLUSH:
Calculate Allowable Release Rate for First Flush Runoff (Vff)
Qff = Vff/(24 hrs)(3600 s/hr)
Qff = 0.189 cfs
Calculate Average Head for First Flush Runoff
H(average) = 2/3(Xff-Xbot)
H(average) = 0.46 ft
Calculate Orifice Area Required for First Flush Discharge
Aff = Qff/(0.62)(2)(gH)^{0.5}
Aff = 0.2853 sq ft
Calculate # of Orifice Openings
Orifice Diam. = 1.5 inches
Area = 0.01271936 sq ft
openings = Aff/Area of orifice
openings = 4.50
openings required = 4.50
Total Area of orifice = 0.04909 sq ft

Calculate Detention Time for Orifice Openings
Qff(new) = Aff(0.62)(2)(gH)^{0.5}
Qff(new) = 0.189 cfs
Tff(new) = Vff/Qff(new)
Tff(new) = 97395.72078 sec
Tff(new) = 26.77 hours
> 24 hour minimum time for discharge

BANKFULL FLOOD
Check FF Orifice to Determine Whether Adequate for BF Discharge in Allowable (Tff < 48 hrs)
Calculate Average Head for First Flush Runoff Orifice
Assume trapezoidal cross section
H(average) = 2/3(Xff-Xbot)
H(average) = 1.75 ft

Calculate Q Utilizing First Flush Orifice
Q = Aff(0.62)(2)(gH)^{0.5}
Q = 0.284 cfs

Calculate Time for Bankfull Discharge (36 hrs < Tff < 48 hrs)
Tff = Vff/Q
Tff = 19954.1208 sec
Tff = 5.53 hours

Determine Additional Orifice Required for Bankfull Discharge Within 48 hrs
V(remaining) = Vff - Vff
V(remaining) = 52322 cft
T(remaining) = V(remaining)/Tff
T(remaining) = 16.0 hrs
Calculate Q and V for Remaining Time
Q = 0.62(Aff)(2)(gH)^{0.5}
Q = 0.2437 cfs
V = T(remaining)Q
V = 16526 cft
Calculate Discharge Volume for Bankfull Orifice
Vffo = Vrem - V
Vffo = 3756 cft
Orifice = Vffo/Trem
Orifice = 0.70055 cfs
Hff = 23000/3756
Hff = 1.29116 ft
Aff = Qff/(0.62)(2)(gH)^{0.5}
Aff = 0.12391 sq ft

Calculate # of Orifice Openings
Orifice Diam. = 1.875 inches
Area of orifice = 0.019137 sq ft
Calculate # of Orifice Required
openings required = 4.50
Total Area of orifice = 0.11505 sq ft

100 YEAR FLOOD
Maximum Allowable Flow = Qa
Qa = 1.59 cfs

Calculate Q100 (flow not accommodated by FF or BF orifice under 100 year conditions)
Hff = X100-Xff
Hff = 3.3 ft
Qff + Qbf = (0.62)(Aff)(2)(gH)^{0.5} + (0.62)(Abf)(2)(gH)^{0.5}
Qff + Qbf = 1.5285 cfs

Calculate Q100
Q100 = Qa - (Qff + Qbf)
Q100 = 0.0655 cfs
Calculate Orifice Area required to Discharge Q100
H100 = X100-Xff
H100 = 1.4 ft
A100 = Q100/(0.62)(2)(gH100)^{0.5}
A100 = 0.01004 sq ft

Calculate # of Orifice Openings
Orifice Diam. = 1 inches
Area of orifice = 0.00545 sq ft
Calculate # of Orifices Needed
Orifice = A100/Area of Orifice
Orifice = 1.84

ORIFICE TABLE

ELEVATION	ORIFICE #	DIAM. (IN)	EXISTING ELEVATION	ORIFICE #	DIAM. (IN)
820.00	4	1.5	820.00	4	1.5
820.68	6	1.875	820.68	6	1.875
822.82	1	1	822.53	1	1

DRAINAGE NARRATIVE:

THIS SITE IS ALREADY HIGHLY DEVELOPED AND HAS AN EXISTING STORM WATER DETENTION SYSTEM. THE EXISTING STORM WATER DETENTION SYSTEM IS DESIGNED TO COLLECT THE 100 YEAR STORM EVENT AND DISCHARGE TO THE OUTLET OVER A PERIOD OF 48 HOURS.

THE PROPOSED IMPROVEMENTS TO THE SITE INCLUDE ADDITIONAL IMPERVIOUS AREA AND ADDITIONAL LANDSCAPING ISLANDS. THE TOTAL INCREASE IN IMPERVIOUS AREA IS 0.18 ACRES. THIS INCREASE HAS A MARGINAL IMPACT ON THE CURRENT DESIGN. THERE ARE NO PROPOSED CHANGES TO THE OUTLET STANDPIPE DESIGN. THE 100 YEAR FLOOD ELEVATION HAS INCREASED BY 0.06 FT. THERE IS NO PROPOSED CHANGE TO THE FREEBOARD ELEVATION. REGRADING FOR 0.09 FEET OF GRADE WOULD BE EXCESSIVELY DISRUPTIVE TO THE EXISTING VEGETATION AND WETLAND AREA.

THE EMERGENCY OVERFLOW ELEVATION IS 0.21 FEET ABOVE THE 100-YEAR STORM VOLUME ELEVATION.

NO CHANGES TO THE EXISTING STORM WATER DETENTION SYSTEM ARE PROPOSED FOR THIS CURRENT SITE PLAN. THE SEDIMENTATION FORBAY WILL NEED TO BE RESTORED TO EXISTING GRADES ONCE THE PHASE III IS COMPLETE AND THE RETAINING WALL IS IN PLACE.

REVISED 10-22-2013
BASED ON AS-BUILT

APPLICATION FOR MODIFICATIONS FROM CHAPTER 62 (LANDSCAPE AND SCREENING)

See www.a2gov.org/planning for submittal requirements.

TO: Ann Arbor City Planning Commission

We, the undersigned, respectfully petition the City Planning Commission or City Council to approve these modifications from the landscape and/or screening requirements of Sections 5:602, 5:603, 5:604 or 5:606 of Chapter 62, as they relate to the property hereinafter described.

A. Project Information

(Give name of site plan project and tax code number of property)

GERMAIN MOTORS

09-12-04-300-056

B. Petitioner Information

The petitioner(s) requesting the modifications are:

(List petitioners' name; address; telephone number; and interest in the land; i.e., owner, land contract, option to purchase, etc.)

WASHTENAW ENGINEERING COMPANY

3526 W. LIBERTY RD, SUITE 400, ANN ARBOR, MI 48103

734-761-8800

AGENT FOR OWNER

Also interested in the petition are:

(List others with legal or equitable interest)

CAR GER MI ANN ARBOR LLC

C. Modification Request

The petitioner requests approval to modify the above landscape and/or screening requirements in the following ways (if necessary, attach additional page):

Section 5:602, Paragraph 2d

TOTAL OF 95 INTERIOR UVA TREES VERSUS 103 REQUIRED

Section 5:602, Paragraph 2g

NO LANDSCAPE ISLANDS ARE DEPRESSED

D. Standards for Approval

Flexibility in the application of the landscape and screening regulations may be allowed if certain standards are met. The modifications must be consistent with the intent of Chapter 62; be included on a site plan and in a motion approved by the City Planning Commission or City Council; and be associated with specific site conditions as listed in Section 5:608(2)(c).

1. What are the specific site conditions that necessitate this request and how do they warrant the modifications of Chapter 62 requirements? (See Section 5:608(2)(c)) List relevant subsection and explain how and to what extent the modifications are justified.

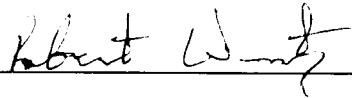

- INTERIOR ISLAND STEEP SLOPES AND SOILS MAKE PLANTING ADDITIONAL TREES
IN LARGE INTERIOR ISLAND IMPRACTICAL. INTERIOR TREE COUNT WILL BE SHORT BY 8.
- MOST OF THE ISLANDS ARE EXISTING ISLANDS WITH ESTABLISHED, HEALTHY TREES.
EXISTING UTILITY LINES PASS UNDER MANY OF THE PROPOSED NEW ISLANDS, MAKING
GRADING OF A DEPRESSED ISLAND DIFFICULT. OTHERS HAVE TOO MUCH SLOPE TO
PROVIDE ANY SIGNIFICANT WATER STORAGE.

2. How does the proposal meet the spirit and intent of Chapter 62? (See Section 5:600)

- INTERIOR ISLAND IS CURRENTLY VEGETATED BY VOLUNTEER TREES WHICH ARE NOT
OVER 6" DBH BUT ARE GROWING ON POOR SOILS. VISUAL APPEARANCE OF ISLAND IS
FULL COVERAGE SO REMOVING THEM IN ORDER TO PLANT 9 ADDITIONAL TREES WOULD
BE COUNTER PRODUCTIVE.
- THE SITE'S STORM WATER DETENTION SYSTEM IS SIZED APPROPRIATELY FOR THE
SITES EXISTING AND PROPOSED SURFACES WITHOUT ANY CHANGES.
- ALL ISLANDS WILL BE ATTRACTIVELY LANDSCAPED AND PROVIDE A CONSISTANT,
ATTRACTIVE LOOK FOR THE CAMPUS.

The undersigned states he/she is interested in the property as aforesaid and that the foregoing statements are true and correct to the best of his/her knowledge and belief.
