Economic Indicators and Monetary Policy

The meeting of the Federal Open Market Committee (FOMC) concluded on March 15 with the anticipated decision to increase the fed funds target rate 25 basis points. The range for the overnight rate is now 0.75% - 1.00%. The FOMC statement retained language indicating future increases in the fed funds target rate would be "gradual". (See Chart 1).

The payroll report released on March 10, showed US employers added 235,000 jobs in February, better than expectations of 200,000 new jobs. January job growth was revised up to 238,000 from the prior release of 227,000 jobs added. The labor force participation rate rose to 63.0% in February from 62.9% in January. The February unemployment rate decreased to 4.7% from 4.8% in January, and the underemployment rate decreased to 9.2% from 9.4%. Average hourly earnings rose by 0.2% in February to a year-over-year rate of 2.8%. Survey expectations were for wage gains of 0.3% in February.

Rising energy prices pushed the headline Producer Price Index (PPI) higher in February. The March 14 release showed February PPI including food and energy increased to 2.2% from 1.6% in January. Excluding food and energy, the core PPI increased 0.3% in February to an annual rate of 1.5%. The Consumer Price Index (CPI) released on March 15 increased to 2.7% in February at the headline level from 2.5% in January, and excluding food and energy the core CPI was 2.2% in February.

The final estimate of fourth quarter 2016 GDP was released on March 30. Largely in response to stronger consumer spending, fourth quarter GDP was revised upward to 2.1% from the previous estimate of 1.9% growth. Personal consumption was revised to 3.5% growth in the fourth quarter from the previous estimate of 3.0%. For the third quarter of last year, GDP was 3.5% and personal consumption was 3.0%.

Interest Rate Summary

On March 31 the 3-month US Treasury bill yielded 0.75%, the 6-month US Treasury bill yielded 0.90%, the 2-year US Treasury note yielded 1.26%, the 5-year US Treasury note yielded 1.92% and the 10-year US Treasury note yielded 2.39% (See Chart 2).

ADDITIONAL INFORMATION

As of March 31, 2017

Past performance is not a guide to future performance. The value of investments and any income from them will fluctuate and is not guaranteed (this may partly be due to exchange rate changes) and investors may not get back the amount invested. Transactions in foreign securities may be executed and settled in local markets. Performance comparisons will be affected by changes in interest rates. Investment returns fluctuate due to changes in market conditions. Investment involves risk, including the possible loss of principal. No assurance can be given that the performance objectives of a given strategy will be achieved. The information contained herein is for your reference only and is being provided in response to your specific request and has been obtained from sources believed to be reliable; however, no representation is made regarding its accuracy or completeness. This document must not be used for the purpose of an offer or solicitation in any jurisdiction or in any circumstances in which such offer or solicitation is unlawful or otherwise not permitted. This document should not be duplicated, amended, or forwarded to a third party without consent from Insight. This is a marketing document intended for professional clients only and should not be made available to or relied upon by retail clients

Investment advisory services in North America are provided through four different SEC-registered investment advisers using the brand Insight Investment: Cutwater Asset Management Corp. (CAMC), Cutwater Investor Services Corp. (CISC), Insight North America LLC (INA) and Pareto Investment Management Limited (PIML). The North American investment advisers are associated with a broader group of global investment managers that also (individually and collectively) use the corporate brand Insight Investment and may be referred to as Insight, Insight Group or Insight Investment.

Both CISC and CAMC are investment advisers registered with the Securities and Exchange Commission (SEC), under the Investment Advisers Act of 1940, as amended. Registration with the SEC does not imply a certain level of skill or training. You may request, without charge, additional information about Insight. Moreover, specific information relating to Insights strategies, including investment advisory fees, may be obtained from CAMCs and CISCs Forms ADV Part 2A, which are available without charge upon request.

Where indicated, performance numbers used in the analysis are gross returns. The performance reflects the reinvestment of all dividends and income. CAMC and CISC charge management fees on all portfolios managed and these fees will reduce the returns on the portfolios. For example, assume that \$30 million is invested in an account with either CAMC or CISC, and this account achieves a 5.0% annual return compounded monthly, gross of fees, for a period of five years. At the end of five years that account would have grown to \$38,500,760 before the deduction of management fees. Assuming management fees of 0.25% per year are deducted monthly from the account, the value at the end of the five year period would be \$38,022,447. Actual fees for new accounts are dependent on size and subject to negotiation. CAMCS and CISC's investment advisory fees are discussed in Part 2A of the Firms Form ADV.

Unless otherwise stated, the source of information is Insight. Any forecasts or opinions are Insights own at the date of this document (or as otherwise specified) and may change. Material in this publication is for general information only and is not advice, investment advice, or the recommendation of any purchase or sale of any security. Insight makes no implied or expressed recommendations concerning the manner in which an account should or would be handled, as appropriate investment strategies depend upon specific investment guidelines and objectives and should not be construed to be an assurance that any particular security in a strategy will remain in any fund, account, or strategy, or that a previously held security will not be repurchased. It should not be assumed that any of the security transactions or holdings referenced herein have been or will prove to be profitable or that future investment decisions will be profitable or will equal or exceed the past investment performance of the securities listed.

For trading activity the Clearing broker will be reflected. In certain cases the Clearing broker will differ from the Executing broker.

In calculating ratings distributions and weighted average portfolio quality, Insight assigns U.S Treasury and U.S agency securities a quality rating based on the methodology used within the respective benchmark index. When Moodys, S&P and Fitch rate a security, Bank of America and Merrill Lynch indexes assign a simple weighted average statistic while Barclays indexes assign the median statistic. Insight assigns all other securities the lower of Moodys and S&P ratings.

Information about the indices shown here is provided to allow for comparison of the performance of the strategy to that of certain well-known and widely recognized indices. There is no representation that such index is an appropriate benchmark for such comparison. You cannot invest directly in an index and the indices represented do not take into account trading commissions and/or other brokerage or custodial costs. The volatility of the indices may be materially different from that of the strategy. In addition, the strategys holdings may differ substantially from the securities that comprise the indices shown.
