Subject: Treeline - Allen Creek Urban Trail

Brett,

In response to the public meeting being held tonight regarding the Treeline Project and the amendment to the City Master Plan, we would like to submit this response on behalf of AAATA. As a service planning staff we reviewed the documents and understand the total depth of the project. As this is a multiple stage project that will have a dramatic effect to our community once fully realized, we do not have significant comments at this time. Our basic concern is the intersection of trail system with road network as these points suggest transit access. This suggestion, although in concept form now, must be developed in tandem with AAATA so we can properly and safely serve the pathway system without creating undue burden on the roadway network.

Thank you for sending this information to our attention and we look forward to further discussions about the City's planning initiatives.

Respectfully submitted,
William De Groot
