

WSAC Description

The City of Ann Arbor has established a Water System Advisory Council (WSAC). The purpose of the WSAC is to advise and assist with the creation of materials and plans to educate our community about lead in drinking water. The WSAC will review public awareness campaign materials provided by the statewide drinking water advisory council to ensure the needs and interests of the community, considering the economic and cultural diversity of its residents, are addressed. The WSAC will also provide guidance to the City on outreach to property owners whose service lines need replaced. The WSAC will meet at least once per year.
