 Check all that apply.

Other (please specify):
 walk, bike,
 drive

Q3 How important is it to make street changes on Traverwood Drive that improve driver and passenger safety?

Very important ,

Comments::

The construction trucks for the new dwellings along this road made a MESS of the road. Traverwood Drive needs to be repaved.

Q4 How important is it to make street changes on Traverwood Drive that improve pedestrian and bicyclist safety?

Not at all important

Q5 Do you support the three (3) to two (2) lane conversion and providing a bike lane on Traverwood Drive?

Do not support

Q6 Do you support installing additional parking on Traverwood Drive?

Comments::

It depends on configuration...did not like what I think I saw on the plans. People want to park as close to library entrance as possible & it appeared to me street parking was eliminated nearest to the library door on the proposed plan?

Q7 Do you have any other thoughts for us to consider?

It is SO important to get input from folks who regularly use this corridor. They have experience at all hours of the day & see how the roadways/site is realistically used on a regular basis...please gather this input before moving forward. ALL would agree that Traverwood needs new pavement. Road surface is ridiculously damaged from recent construction traffic. The potholes alone are a bike, car, ankle hazard.

Important

Q4 How important is it to make street changes on Traverwood Drive that improve pedestrian and bicyclist safety?

Important

Q5 Do you support the three (3) to two (2) lane conversion and providing a bike lane on Traverwood Drive?

Support

Q6 Do you support installing additional parking on Traverwood Drive?

Higly support,

Comments::

Are you actually adding parking? It seems the answer is no; you are moving existing parking to the opposite side of the street. There is already a problem with adequate parking at the library. Also, if people with children are now parking on the opposite side of the street, I am concerned about children opening car doors and crossing the street. I understand that improvements to access the sidewalk are necessary; however, this solution doesn't seem to be the best scenario. Did you consider putting the bike lane on the west side of the street?

Q7 Do you have any other thoughts for us to consider?

I am concerned about families with children parking on the west side of Traverwood and then needing to cross the street. Additionally, there is a problem already with non-library users parking adjacent to the library and this scenario seems like it will amplify that problem.

Walking,**Bicycling,****Riding the bus ('The Ride')****Driving**

Q3 How important is it to make street changes on Traverwood Drive that improve driver and passenger safety?

No opinion

Q4 How important is it to make street changes on Traverwood Drive that improve pedestrian and bicyclist safety?

Important,

Comments::

My biggest issue is in the visibility associated with non-motorized use of the road (e.g., by bikes) and the curvature of the road. I'm not sure there's anything to do about it, but bike lanes might be good. The sidewalks/multiuse paths sometimes have quite a bit of blockage from tree and bush branches that also reduce visibility. Overall, though, I don't see it as a huge issue per se.

Q5 Do you support the three (3) to two (2) lane conversion and providing a bike lane on Traverwood Drive?

Higly support,

Comments::

Exactly the kind of change I think is welcome.

Q6 Do you support installing additional parking on Traverwood Drive?

Do not support,

Comments::

For this part of town, it's the equivalent of providing free parking to potential future developers. I don't think it's really a public purpose for the city to provide free parking. If future development needs additional parking, that should be up to the developers to provide and the city to ensure that the projects follow good environmental, health, and safety practices and city requirements.

Q7 Do you have any other thoughts for us to consider?

I think it would be a good idea to include one or more mid-block crosswalks. The library and office buildings are on opposite sides of the street and crossing where there is a significant curvature results in potential for vehicle-pedestrian conflict/collision.

 Check all that apply.

Walking,
Bicycling,
Driving

Q3 How important is it to make street changes on Traverwood Drive that improve driver and passenger safety?

Very important,
 Comments::
 The biggest need is for resurfacing - the current surface is dangerous for cyclists. Bicycle lanes on both sides of the street would be great.

Q4 How important is it to make street changes on Traverwood Drive that improve pedestrian and bicyclist safety?

Very important,
 Comments::
 I cycle on Traverwood regularly. Northbound is dangerous because it is a steep uphill so cyclists tend to be moving slowly, the road surface is such a mess that cyclists often have move farther away from the curb, some motorists refuse to move over into the middle lane when passing cyclists. Southbound is dangerous because of the parking by the library, which results in doors opening unexpectedly, people making illegal U-turns in front of you in order to get into a parking space, and people parking in the southbound lane right at the intersection to drop off or pick up someone.

Q5 Do you support the three (3) to two (2) lane conversion and providing a bike lane on Traverwood Drive?

Do not support,
 Comments::
 I do not support a change that only puts a bike lane on one side of the street. Do you think southbound cyclists don't need a lane as well?

Traverwood Drive Lane Conversion Survey, May 2019

Q6 Do you support installing additional parking on Traverwood Drive?

Do not support,

Comments::

There is absolutely no need for additional parking on Traverwood. More parking will actually make it less safe for cyclists as they will need to ride farther out into the southbound lane to avoid opening car doors while going down the hill.

Q7 Do you have any other thoughts for us to consider?

There needs to be better enforcement of driver behavior on Traverwood. The U-turns mentioned above are one problem. Another problem is the fact that construction and lawn care vehicles regularly park in the center lane of Traverwood.

4. How important is it to make street changes on Traverwood Drive that improve pedestrian and bicyclist safety?

Very important Important No opinion Low importance Not at all important

☒ ☐ ☐ ☐ ☐

Comments: Moving parking to the street in front of the
library is a good idea to help reduce the slope.

7. Do you have any other thoughts for us to consider?

The Traver Blvd to Nixon is being reduced due to roundabouts. If you also take auto lane from Traverwood, automobile traffic is penalized. Automobile should have priority over parking and bikes!!
