RE: Required Site Plan Information Reorganization

DATE: October 15, 2019

Section 5.29 Specific Procedures of the UDC contains a number of redundant code sections. In order to streamline and simplify the requirements for various types of site plans, the attached reorganization of existing code is proposed by staff. The amendments consolidate all site plan requirements into one list in a new section 5.29.8 Required Plan Information, with a table indicating which information is required for each type of site plan.

c. Brett Lenart, Planning Manager
