Re: Triennial Lead and Copper Sampling

Dear :

The Michigan Department of Environment, Great Lakes, and Energy (EGLE) requires Ann Arbor to sample for lead and copper in water from at least 50 homes every three years. We are asking for your assistance in meeting this requirement. According to the information we have on file, your residence meets EGLE's criteria and we would greatly appreciate your participation in the sampling. **Please go to www.a2gov.org/LCRSurvey or call us at (734) 994-2840 by June 30 to indicate your willingness to provide a water sample from your residence.** Contact us at (734) 994-2840 or water@a2gov.org if you have any questions. Thank you for helping us meet this requirement!

COVID-19 Precautions: *Non-contact procedures will be used for sampling. Sample kits will be disinfected prior to being dropped off at the home. Homeowners will take a sample according to provided instructions and then contact the City for sample pick up.*

In addition, researchers from the University of Michigan are looking for volunteers to participate in a survey about Ann Arbor's drinking water. The survey will gather feedback with the goal of improving future drinking water services. If you are interested in participating, please respond at www.a2gov.org/LCRSurvey.

Sincerely,

Brian Steglitz, Water Treatment Services Manager
