

STARWICK DRIVE  
2008 Annual Traffic Calming Survey, Constructed in November 2007

- 35 Annual Survey Postcards Mailed in November 2008
- 2 Cards Returned as Vacant/Return to Sender
- SATISFIED COMMENTS (15 of 16 cards = 93.75%)
  1. Some still turn left
  2. The better question would be "are they effective" – yes – "speed bumps" is a more direct name.
  3. It makes a big difference, esp. since I have young children
  4. They could have been higher though, but they beat nothing!
  5. Very Happy! The entire process was well organized and professional. Thank you!
  6. Thanks! Traffic has been reduced considerably. We are enjoying the impact it made.
  7. I feel our street is much safer now from traffic. A lot less volume of traffic.
  8. Thank you – it has helped.
  9. Speed bumps area great. Costly reshape of curb? Before the City installed a no parking sign at that point, a car often parked there. This relieved some of limited parking area, and acted even better than the curb extension.
- DISSATISFIED COMMENTS (1 of 16 cards = 6.25%)
  1. The device is not high enough, some are having a joy ride.

TRAVER STREET  
2009 Annual Traffic Calming Survey, Constructed in April 2008

- 21 Annual Survey Postcards Mailed in April 2008
- 2 Cards Returned as Vacant/Return to Sender
- SATISFIED COMMENTS (5 of 9 cards = 55.56%)
  1. Our traffic truly slowed down! Thank you.
- DISSATISFIED COMMENTS (4 of 9 cards = 44.44%)
  1. Your speed humps idea is the right thing, but I live diagonally to Pear St., and I witness traffic all the time, in fact today an A2 city truck just sailed over your speed hump. The humps are too low and too broad. Nearly all traffic that I witness including many A2 city vehicles just blast right over your new speed hump. You do have effective humps on Yost/Brandywine. (Note: this responder did not indicate if they were overall satisfied or not satisfied)
  2. They speed to the 1<sup>st</sup> device...& after the second device! Not very effective.
  3. We voted against this. We have lived there 45 years and didn't need this device.
  4. Has not reduced speeding on Traver Rd. They just launch vehicles over bump!!
