Attachment A: Corporation License

This is to Certify That

KENNEDY INDUSTRIES, INC.

was validly incorporated on April 9, 1964, as a Michigan profit corporation, and said corporation is validly in existence under the laws of this state.

This certificate is issued pursuant to the provisions of 1972 PA 284, as amended, to attest to the fact that the corporation is in good standing in Michigan as of this date and is duly authorized to transact business and for no other purpose.

This certificate is in due form, made by me as the proper officer, and is entitled to have full faith and credit given it in every court and office within the United States.

Sent by Facsimile Transmission 1456342

In testimony whereof, I have hereunto set my hand, in the City of Lansing, this 20th day of June, 2017.

Julia Dale, Director

Corporations, Securities & Commercial Licensing Bureau

PUMP REPAIR SERVICE: 61 years (since 1959)

KEY PERSONNEL FOR THIS PROJECT

MIKE S. HORN Repair Center Manager

JULIAN C. URSING Shop Supervisor

BRIAN M. ALEXANDERMachine Shop Supervisor

ANDY J. JENSEN Project Engineer

TRACY L. SLAPSHAK3D Cad Design

MICHAEL D. KUBASTA Lead Machinist

Mike Horn Repair Center Manager

Mike Horn has been employed with Kennedy Industries for 24 years. All of his training has been received on-the-job. He has learned a vast number of valuable skills through various postions he has held within the company over the last 24 years. He has been a maintenance worker, truck driver, pump mechanic, field service technician, as well as working in CAD design, machine shop supervisor, and shop supervisor. Mike now manages Kennedy Industries' repair center that is capable of working on pumps of up to 7,000 HP. He is responsible for five supervisors and a total of 34 employees in the repair center. His daily responsibilities include completing repair quotes and pump reports, managing trucking logistics, building operations, and production scheduling.

Mike has overseen the repairs of many large pumps, including but not limited to:

- Detroit Edison
 - o Repair, install, and startup of Boiler Feed Pumps.
 - o Repair, install, and startup of Cooling Water Circulation Pumps (50,000 150,000 gpm).
- ❖ Wavne County Milk River
 - o Supervised repair on Fairbanks Morse 72" Vertical Pumps (135,000 185,000 gpm).
- **❖** MDOT: I-696, Lodge, I-94
 - o Supervised repair on various Storm Water Pumps.
- Paliside Power Cooling Tower Rebuild
 - o Repaired pumps and de-rated from 210,000gpm to 195,000gpm.

Mike's extensive experience in the pump industry has fully prepared him to supervise any pump repair and ensure the highest possible standard of excellence.

Julian Ursing Shop Supervisor

Julian Ursing has been employed with Kennedy Industries for 18 years. As lead mechanic, Julian is responsible for overseeing all pump mechanics during the disassembly and assembly process. Julian is also responsible for communication between the shop and the office, ensuring all parts are ordered correctly and all steps of the process flow smoothly. He has worked and learned under Kennedy Industries' CEO, Jeff Nachtweih, and the repair center manager, Mike Horn, gaining extensive knowledge and valuable hands on experience during his 18 years at Kenndy Industries.

Julian has participated in many large pump repairs, including but not limited to:

- Detroit Edison
 - o Disassembly, inspection, and assembly of Boiler Feed Pumps.
 - Disassembly, inspection, and assembly of Cooling Water Circulation Pumps (50,000 150,000 gpm).
- ❖ Wayne Count Milk River
 - Disassembly, inspection, and assembly of Fairbanks Morse 72" Vertical Pumps (135,000 185,000 gpm).
- **❖** MDOT: I-696, Lodge, I-94
 - o Disassembly, inspection, and assembly of various Storm Water Pumps.
- Paliside Power Cooling Tower Rebuild
 - O Disassembly, inspection, assembly of pumps and de-rated from 210,000gpm to 195,000gpm.

Julian's hands on experience and extensive knowledge makes him an invaluable resource during pump repairs at Kennedy Industries.

Brian AlexanderMachine Shop Supervisor

Brian Alexander has been employed with Kennedy Industries for 15 years. As the machine shop supervisor, Brian is responsible for overseeing the machinists during the machining process. All of his training has been received on-the-job. He has been a machinist and a mechanic, as well as working in CAD design. Brian supervises 7 machinists and 2 welders, encompassing years of experience in the machining trade.

Brian has managed the machining of many large projects, including but not limited to:

- Detroit Edison
 - o Supervised all machining of Boiler Feed Pumps.
 - Supervised all machining of Cooling Water Circulation Pumps (50,000 150,000 gpm).
- ❖ Wayne County Milk River
 - Supervised all machining on Fairbanks Morse 72" Vertical Pumps (135,000 185,000 gpm).
- ❖ MDOT: I-696, Lodge, I-94
 - o Supervised all machining on various Storm Water Pumps.
- Paliside Power Cooling Tower Rebuild
 - o Supervised all machining on largest pump in the state.

Brian's knowledge and practical work experience allows him to ensure quality products and excellence in the machine shop for every job.

Andy Jensen Project Engineer

Andy Jensen has been employed with Kennedy Industries for 9 years. He spent the first 8 years as an engineered pump mechanic, and in the past year has moved to the role of project engineer. Andy is now responsible for quality checks, inspection reports, bills of material, routers, and prints to verify all the correct information is documented and in specification. He has worked and learned under Kennedy Industries' CEO Jeff Nachtweih, repair center maganer Mike Horn, and shop supervisor Julian Ursing gaining knowledge and valuable hands-on experience during his 9 years at Kennedy Industries.

Andy has participated in many large pump repairs, including but not limited to:

- Detroit Edison
 - o Disassembly, inspection, and assembly of Boiler Feed Pumps.
 - Disassembly, inspection, and assembly of Cooling Water Circulation Pumps (50,000 150,000 gpm).
- ❖ Wayne County Milk River
 - Disassembly, inspection, and assembly of Fairbanks Morse 72" Vertical Pumps (135,000 185,000 gpm).
- ❖ MDOT: I-696, Lodge, I-94
 - o Disassembly, inspection, and assembly of various Storm WaterPumps.
- Paliside Power Cooling Tower Rebuild
 - O Disassembly, inspection, assembly of pumps and de-rated from 210,000gpm to 195,000gpm.

Andy's hands on experience and extensive knowledge make him an invaluable resource during pump repairs at Kennedy Industries.

Tracy Slapshak 3D CAD

Tracy Slapshak has been employed with Kennedy Industries for 31 years. He held the positions of mechanic, machinist, CNC machinist and machine shop supervisor before transitioning to 3D CAD. Tracy is responsible for creating 3D models and prints of all parts that Kennedy Industries will manufacture. He is also responsible for writing up machine shop routers listing all machine work that each pump repair will require.

Tracy has been involved in a great many large pump repairs.

- Detroit Edison
 - o Making prints, routing and machining parts of Boiler Feed Pumps.
 - Making prints, routing and machining parts for Cooling Water Circulation Pumps (50,000 150,000 gpm).
- ❖ Wayne County Milk River
 - Making prints, routing and machining of Fairbanks Morse 72" Vertical Pumps (135,000 185,000 gpm).
- **❖** MDOT: I-696, Lodge, I-94
 - o Making prints, routing and machining of various Storm WaterPumps.
- Paliside Power Cooling Tower Rebuild
 - o Making prints, routing and machining of pumps de-rated from 210,000gpm to 195,000gpm.

Tracy's years of experience and knowledge of Kennedy's processes makes him an important resource during pump repairs at Kennedy Industries.

Mike Kubasta Journeyman Machinist

Mike Kubasta has been employed with Kennedy Industries for 11 years. All of his training has been received on-the-job. He has been a machinist and a mechanic, as well as working in field service. Mike is also in charge of shop machine maintenance and repair. He ensures all machines function correctly and accurately.

Mike has machined many large projects, including but not limited to:

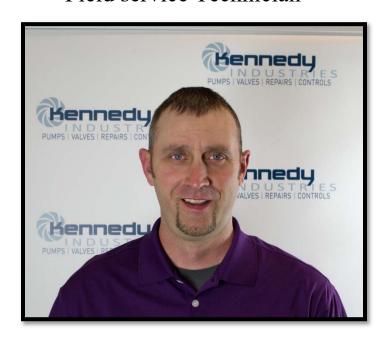

- Detroit Edison
 - o Supervised all installation of Boiler Feed Pumps.
 - o Machining on Cooling Water Circulation Pumps (50,000 150,000 gpm).
 - o Machining on boiler feed pumps.
- ❖ Wayne County Milk River
 - o Machining on Fairbanks Morse 72" Vertical Pumps (135,000 185,000 gpm).
- **❖** MDOT: I-696, Lodge, I-94
 - o Machining on various Storm WaterPumps.
- Paliside Power Cooling Tower Rebuild
 - o Machining on largest pump in the state.

Mike's knowledge and practical work experience allow him to accurately set up large parts and ensure the finished product is of the utmost quality.

Ryan Noll

Field service Technician

Ryan has been employed with Kennedy Industries since 2011. He is the team leader of the Engineered Field Service department.

Ryan has performed multiple startups and field repairs, including but not limited to:

- Detroit Edison
 - o Repair and startup of Boiler Feed Pumps.
 - o Repair and startup of Cooling Water Circulation Pumps (50,000 150,000 gpm).
- Detroit Metro Airport
 - Provided startup on Cascade Storm Water Pumps.
- University of Michigan
 - o Install and startup of Cooling Tower Pumps with Flow Testing (6,000gpm)
- Grosse Pointe Woods
 - o Maintenance and oil change on (5) Allis Chalmers pumps (4,000-26,000gpm)
- Palisades Energy
 - Install and startup of Cooling Tower Pumps (164,000 gpm)

Ryan's knowledge and practical work experience allows him to handle nearly all situations related to pumps.

Glenn Smith

Field service Technician

Glenn Smith has been employed with Kennedy Industries since 2007. He is the team leader of the Municipal Field Service department. As a field service technician, he is responsible for startup, troubleshooting and field repair of pumps, control panels and valves.

Glenn has performed multiple startups and field repairs, including but not limited to:

- City of Detroit WWTP
 - Startup Cascade vertical pumps and motors
 - Startup Flygt sump pumps and panels
- ❖ Arbor Hills Landfill
 - o Remove, reinstall, and startup Goulds End Suction Pump
- Monroe County Drain
 - Removal, reinstall and startup of Flygt submersible pumps and Flygt submersible mixed flow pumps, ranging to 125HP
- MDOT. Multiple locations
 - o Removal, install and startup of vertical and submersible mixed flow pumps ranging from 50HP to 150HP.

Glann has been trained and certified in all of the following:

OSHA 10, Singer Valves, EIM Controls, Square D Drives, Singer Advanced Electronics, Limitorque Controls and Actuators, JWC Muffin Monster, Flygt Pumps.

Glenn's knowledge and practical work experience allows him to handle nearly all situations related to pumps, valves and controls.

Company History

CALVIN B. KENNEDY founded our company in May of 1959 when he left his position as repair and service supervisor at a pump company. With \$102.00 he started Kennedy Pump Repair Company in the back of a pickup truck. His dedication and honesty soon established Kennedy as a successful pump repair facility servicing Southeast Michigan.

In 1968, Cal added a distributor type sales department to compliment the steady growth of the repair facility. Allis-Chalmers, ITT-AC Pump, was the first major principal and continues to be one of Kennedy Industries core principals to this day.

In May of 1988, Kennedy Industries moved into their new 8,000 square foot shop and office facility in Milford, Michigan. Continued growth in the pump repair and new product sales led to a new and exciting chapter in Kennedy Industries history.

ConValco, a company specializing in the sale of engineered valves was acquired and successfully integrated in 1990. Exclusive sales agreements were made with numerous valve manufacturers including DeZurik, Singer Valve, Bray and APCO among others. Our continued growth necessitated a building expansion of 10,000 square feet in 1994. Another 12,000 square feet was added in 1999 and a new 40,000 square foot office/warehouse facility was added in Lyon Township in 2011, for a total of 70,000 square feet between the two buildings.

In June of 2014, Kennedy Industries broke ground to begin building a brand-new facility in Wixom. The new facility features 20,000 square feet of office, engineering, IT, controls and a training center. It also boasts 80,000 square feet of engineered pump repair, submersible pump repair, field service, weld shop, blast room, painting center, shipping and receiving, inventory warehouse, and a pump testing pit. The shop also contains nine 15-ton cranes and two loading docks, making it possible to handle any size equipment.

On May 20th, 2015, all Kennedy Industries employees moved from the Milford and New Hudson locations into the new state of the art facility in Wixom. The move was a massive undertaking that with the hard work of the entire Kennedy Team, went seamlessly with minimal interruption. Today over 86 employees and counting work at the Wixom facility.

In September of 2017, Kennedy Industries opens a new office and repair shop in Byron Center, Michigan. The 11,000-square foot facility will ensure that the western Michigan customers are provided with world class customer service.

World class principals were also part of our focus to add new products and our continuous efforts to upgrade our overall product offering resulted in the addition of Link-Seal, Limitorque, Fontaine and Xylem: Flygt; Sanitaire; Leopold; Wedeco along with a full offering of station and plant controls, telemetry and SCADA. The addition of ABB variable frequency drives and Baldor motors in 2015 strengthened our customer offering, allowing Kennedy Industries to be a "one stop" company.

The last two decades have been a period of dramatic change for Kennedy Industries. As our company has grown, we have procured new facilities in addition to expanding our existing, culminating with the new Wixom facility. We are fully equipped to provide the highest quality, most competitive repair services and products throughout the Midwest.

Kennedy Industries ERP, CRM, IT and financial systems were completely upgraded in 2017. This substantial investment was made to enhance product and customer service offerings to new customers and new markets. Kennedy's history will never be forgotten as the same strong values and principals apply today. We will continue the same honesty & integrity that has made us successful for over 60 years servicing our customers.

TIMELINE

- 1959 Kennedy Industries was founded by Calvin B. Kennedy.
- 1968 Cal brought in Bud Green as a partner managing the distributor type sales department.
- 1969 Kennedy Industries opened in Wixom, Michigan.
- **1976** Ed Eberle is brought into ownership and manages the sales department.
- 1986 Darrell Underwood is brought into ownership as Cal Kennedy retires from the company.
- 1988 Kennedy Industries moves to new facility in Milford, Michigan totaling 10,000 square feet.
- 1990 Kennedy Industries acquires ConValco, a company specializing in the sales of engineered valves.
- 1991 Expansion of Milford facility to total 20,000 square feet.
- 1995 Jeff Nachtweih, Steve Sadler and Dave Lake assume ownership for the retiring Ed Eberle.
- 1997 Kennedy Industries acquires the Flygt pump line.
- 1999 Expansion of Milford facility to total 30,000 square feet.
- 2005 Kennedy Industries growth requires move of industrial personnel, inventory, shipping and receiving to 15,000 square feet facility in New Hudson, Michigan.
- 2008 Dave Lake retires from Kennedy Industries.
 Jeff Nachtweih and Steve Sadler remain in ownership.
- **2010** Mark Hemeyer is brought into ownership as Steve Sadler retires from Kennedy Industries.
- 2010 Kennedy Industries adds Controls Department.
- 2011 Kennedy Industries growth requires move of industrial, municipal, controls, field service, submersible pump repair personnel, inventory and shipping and receiving to 40,000 square feet facility in New Hudson, Michigan.
- **2014** Kennedy Industries breaks ground on new 100,000 square foot facility in Wixom.
- **2015** Kennedy Industries moves into new facility in Wixom, Michigan.
- **2017** Kennedy Industries opens new 11,000 square foot facility in Byron Center, Michigan.
- **2018** Kennedy Industries enters the treatment market signing with Sanitaire, Wedeco, and Leopold.
- **2020** Kennedy Industries joins Vessco Holdings platform of six water focused companies

Facility

Personnel

"There is no better feeling than putting in the effort, learning, contributing and the feeling of accomplishment... which all leads to success!"

"I enjoy being challenged with opportunities that have a meaningful and beneficial impact on others, communities and the environment."

"I come to work every day because I like what I do, I like the people I work with, and I like the people I work for."

MUNICIPAL OUTSIDE KEY ACCOUNT MANAGERS

NICK HEINTZ

Business Development Manager

Nick has been with Kennedy since 2005.

DOUG WEIL
Repair Sales / Key Account Manager

Doug has been with Kennedy since 1997.
Michigan territory and out of state repair sales.
He specializes in the Power, Nuclear and Gas markets.

TRAVIS COLE
Key Account Manager
Travis has been with Kennedy since 2020.
Southern and Mideastern Michigan territory.

ROBERT ANTONISHEK
Key Account Manager
Robert has been with Kennedy since 2014.
Western Michigan territory.
He brings 15+ years of experience in the industry.

KEITH SIKAITIS
Key Account Manager
Keith has been with Kennedy since 2000.
Southeastern Michigan territory.

JEFF JENSEN
Key Account Manager

Jeff has been with Kennedy since 2011.
Southeastern Michigan territory.
He handles all markets of Industrial products for key accounts.

MIKE KALOTA

Key Account Manager

Mike has been with Kennedy since 2014.
End User/Aftermarket, Generator Sales.

Key Account Manager

Jason has been with Kennedy since 2019.
Indiana, Illinois and Wisconsin territory.
He handles all markets of Industrial products for key accounts.

JASON COMPTON

BEN MANLONGAT

RICK ALVAREZ
Key Account Manager
Rick has been with Kennedy since 2013.
Southwestern Michigan territory.

SPENCER HASBROUCK
Key Account Manager
Spencer has been with Kennedy since 2012.
Southeastern Michigan territory.
He handles all markets of industrial products for key accounts.

JIM BAKOS

Key Account Manager

Jim has been with Kennedy since 2018.

Northern Michigan territory.

BEN SCRACE
Key Account Manager
Ben has been with Kennedy since 2021.
Central Eastern Michigan territory.

Controls Sales Manager

Ben has been with Kennedy since 2010.

He brings 15+ years of PLC/SCADA project, programming, and engineering experience to the Controls Team.

INSIDE SUPPORT STAFF

BRYAN DAVIDSON

Inside Team Lead / Chief Project Estimator

Bryan has been with Kennedy since 2016. He is responsible of managing the inside team, bids & specification projects, submittals, purchasing and assisting Key Account Managers.

CINDY WOODARD

Senior Project Manager

Cindy has been with Kennedy since 1980. She is responsible for customer purchase orders, submittals, purchasing and assisting Key Account Managers.

HEATHER LAKE

Senior Project Manager

Heather has been with Kennedy since 1995. She is responsible for customer purchase orders, submittals purchasing and assisting Key Account Managers.

CHRISTINE HUEPENBECKER

Project Manager

Christine has been with Kennedy since 2015. She is responsible for customer purchase orders, submittals, purchasing and assisting Key Account Managers.

JESSICA RIVARD

Project Manager

Jessica has been with Kennedy since 2018. She is responsible for customer purchase orders, submittals, purchasing and assisting Key Account Managers.

IRENE LITNER

Project Manager

Irene has been with Kennedy since 2016. She is responsible for customer purchase orders, submittals, purchasing and assisting Key Account Managers.

MADDIE MORAN

Administrative Specialist

Maddie has been with Kennedy since 2021. She is responsible for administrative support throughout the company, handles special projects and supports inside customer service and project managers.

DAWN HARKNESS

Senior Customer Support Representative

Dawn has been with Kennedy since 1990. She is responsible for customer purchase orders, submittals, purchasing and assisting Key Account Managers. Dawn also handles key accounts such as Detroit Edison and Consumers Energy.

TOM KILGORE

Customer Support Representative

Tom has been with Kennedy since 2019. He is responsible for customer purchase orders, submittals, purchasing and assisting Key Account Managers.

CHAD WINES

Customer Support Representative

Chad has been with Kennedy since 2020. She is responsible for customer purchase orders, submittals, purchasing and assisting Key Account Managers

ASHLEY ADAMS

Customer Support Representative

Ashley has been with Kennedy since 2020. She is responsible for customer purchase orders, submittals, purchasing and assisting Key Account Managers.

JENNIFER ABAJAY

Customer Support Representative

Jennifer has been with Kennedy since 2020. She is responsible for customer purchase orders, submittals, purchasing and assisting Key Account Managers.

ERIC GRIFFITH

Application Engineer

Eric has been with Kennedy since 2018. He is a state licensed PE that provides engineering assistance to our customers.

ERIC WILDE
Application Engineer

Eric has been with Kennedy since 2020. He is a state licensed PE that provides engineering assistance to our customers

REPAIR CENTER

MIKE HORN Repair Center Manager

Mike has been with Kennedy since 1995. He manages all quoting and operations. He also sets production schedule.

JULIAN URSING
Shop Supervisor - Mechanics
Julian has been with Kennedy since 2001.

ANDY JENSEN
Repair Center Estimator

Andy has been with Kennedy since 2010. He is responsible for all quotes in the repair department.

QUINTON MCLEISH *Mechanic*Quinton has been with Kennedy since 1988.

SARAH RAHN Lead Repair Project Manager

Sarah has been with Kennedy since 2016. She is responsible for quoting, transportation scheduling and all repair project managers.

JOE SNOOK

Mechanic

Joe has been with Kennedy since 1994.

GABBIE ROSS Repair Project Manager

Gabbie has been with Kennedy since 2018. She is responsible for purchasing and customer purchase orders for the Repair Center.

JIM TURNER

Mechanic

Jim has been with Kennedy since 2007.

CODY BYERS Repair Project Manager

Cody has been with Kennedy since 2018. He is responsible for purchasing and customer purchase orders for the Repair Center.

JOEL KIMBALL
Mechanic
Joel has been with Kennedy since 2010.

KARA ALLEN Repair Project Manager

Kara has been with Kennedy since 2020. She is responsible for purchasing and customer purchase orders for the Repair Center.

MECHANICS

(CONTINUED)

JASON DUBOIS Submersible Repair Supervisor Josh has been with Kennedy since 2011.

BRIAN ALEXANDER Shop Supervisor - Machinists Brian has been with Kennedy since 2004.

JOSH TURNER Mechanic Josh has been with Kennedy since 2011.

TRACY SLAPSHAK CAD/Solid Work Technician Tracy has been with Kennedy since 1987.

TOM MCVEY Mechanic Tom has been with Kennedy since 2014.

BENATHAN DEMAN Machinist Benathan has been with Kennedy since 2006.

DANIEL LIRA-ARROYO Mechanic Daniel has been with Kennedy since 2017.

MIKE KUBASTA Machinist Mike has been with Kennedy since 2008.

ANDREW RANBARGER Andrew has been with Kennedy since 2019.

JASON VAN EIZENGA Jason has been with Kennedy since 2013.

JACK UTECHT Mechanic Jack has been with Kennedy since 2020.

CAD & SOLID WORKS TECHNICIANS

MIKE HORN DOUG WEIL SPENCER HASBROUCK ANDY JENSEN TRACY SLAPSHAK

(Pictures for these employees are available in other departments.)

MACHINISTS

ZAC FRATZKE

Machinist

Zac has been with Kennedy since 2013.

KEVIN MCLEISH
Shipping and Receiving Supervisor
Kevin has been with Kennedy since 1984.
He handles all shipping of products that come in and out of Kennedy and inventory control.

JUSTIN MCCOY

Machinist

Justin has been with Kennedy since 2016.

DANE BULLEN
Shipping and Receiving
Dane has been with Kennedy since 2014.
He handles shipping and receiving of product and inventory.

DILLION YOUNG

Machinist

Dillion has been with Kennedy since 2016.

MATT MCDONALD
Shipping and Receiving
Matt has been with Kennedy since 2018.
He handles shipping and receiving of product and inventory.

WELDERS

CHRIS BEADNELL
Certified Welder
Chris has been with Kennedy since 2010.
He is certified to ASME 9 code.

TRANSPORTATION

RYAN PATRICK
Transportation Specialist
Ryan has been with Kennedy since 2007.

JEREMY CUSHEN

Transportation Specialist

Jeremy has been with Kennedy since 2014.

MAINTENANCE

LUCAS KALUSH *Maintenance Supervisor*Lucas has been with Kennedy since 2015.

DAN MALEK
Maintenance
Dan has been with Kennedy since 2013.

MARK CUNNINGHAM
Maintenance
Mark has been with Kennedy since 2019.

JACOB HENRICKSON

Maintenance

Jacob has been with Kennedy since 2019.

JOE FAUVER

Maintenance / Transportation Specialist

Joe has been with Kennedy since 2020.

FIELD SERVICE

BRANDON JEANNETTE

Field Service Manager

Brandon has been with Kennedy since 2015. He is Kennedy's field service coordinator and handles special projects.

SEAN MCDONALD

Field Service Project Manager

Sean has been with Kennedy since 2016. He is Kennedy's field service coordinator and handles special projects.

KIM TRIMBLE

Field Service Project Manager

Kim has been with Kennedy since 2019. She is Kennedy's field service coordinator and handles special projects.

CAITE DUSBIBER

Field Service Project Manager

Catie has been with Kennedy since 2016. She is Kennedy's field service coordinator and handles special projects.

BRETT PETHERS

FIELD SERVICE CONTROLS

Controls Engineer/Field Service

Brett has been with Kennedy since 2016. He performs PLC/SCADA programming and onsite startups for Controls projects.

JIM HICKS

Operations Manager - Controls Department
Jim has been with Kennedy since 2021.

GLENN SMITH

Lead Municipal Field Service Technician
Glenn has been with Kennedy since 2007.

RYAN NOLL

Lead Industrial Field Service Technician

Ryan has been with Kennedy since 2011.

GREG PHIPPS

Field Service Technician

Greg has been with Kennedy since 2017.

SHANON ELLIS

Field Service Technician

Shanon has been with Kennedy since 2018.

RYAN ADAMS

Field Service Technician

Ryan has been with Kennedy since 2018.

CODY LAMBERT

Field Service Technician

Cody has been with Kennedy since 2018.

FIELD SERVICE TECHNICIANS WESTERN MICHIGAN

JOHN OROLIMField Service Technician
John has been working with Kennedy since 2007.

STEVEN DEVRIES
Field Service Technician
Steven has been working with Kennedy since 2007.

JC VAN HARN
Field Service Technician
JC has been with Kennedy since 1995.

CALEB NIEWIANDOMSKIField Service Technician
Caleb has been with Kennedy since 2020.

MARK FOX
Field Service Technician
Mark has been with Kennedy since 2020.

SPECIALTY PERSONNEL

MARK HEMEYER

President

Mark has been with Kennedy since 1989.

CRAIG CZAJKOWSKI, CPA

Accounting / HR

Craig has been with Kennedy since 2015.

He assists Shirley in handling accounts payable/
accounts receivable and human resources.

ZACH O'BRIEN, CPA
Assistant Controller
Zach has been with Kennedy since 2020.
He assists Craig in handling accounts payable/accounts receivable and human resources.

MARGIE URSING

Process manager / ERP

Margie has been with Kennedy since 2009.

MITCHELL SOBEL

Datacenter Administrator

Mitchell has been with Kennedy since 2016.

He performs IT technical support to

Kennedy Industries and the Controls Group.

ERP Integrator

Kevin has been with Kennedy since 2017.

He assists Controls projects with PLC/SCADA programming.

Operations

INDUSTRIAL SALES

COMMERCIAL SALES

MUNICIPAL SALES

WATER/ WASTEWATER PROCESS SALES

REPAIR & FIELD SERVICE

CONTROLS SALES & INTEGRATION

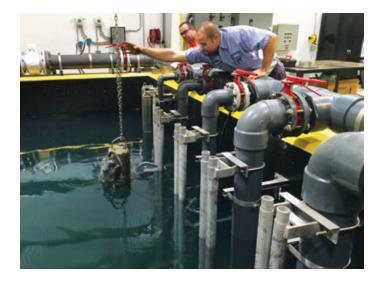

KENNEDY INDUSTRIES operates with five separate profit centers:

- Industrial Sales
- Commercial Sales
- Municipal Sales
- Water/Wastewater Process Sales
- Repair & Field Service
- Controls Sales & Integration

Each division is consistently profitable and strives to be dominant in its field. Our outside, inside, repair, field service and parts sales force is experienced in the Industrial-Commercial, Municipal, Repair, Field Service, Controls, and Treatment market and is second to none.

We strive to align ourselves with industry leading manufacturers of engineered equipment on an exclusive basis. Our goal is dominance in the markets we cover and to be in the top quarter of performance for all of our Principals. Another area of change is working through resellers and supply houses, when circumstances dictate. This has been brought about by the increase in blanket alliances in the automotive, paper and other markets. Our area of coverage is the State of Michigan, Lower Peninsula, with a few accounts in the Eastern side of the Upper Peninsula and Northwest Ohio. Our Repair and Field Service departments serve many states in the Midwest and beyond.

Our Industrial sales group is computer connected with the purchasing departments of Ford, Chrysler, General Motors, DTE Energy, Consumers Energy, and US Steel through their proprietary systems. Many of our principals are also online and/or web-based. We send and receive orders and acknowledgments and communicate via electronic means or e-mail. Our Municipal and

Industrial sales group represents some of the most premier engineered product manufacturers in Michigan. Our strengths are specification work at the consulting engineer level and service after the sale. We are financially strong. We buy/sell 90% of our projects and we are staffed to produce shop drawings and operation and maintenance manuals as specifications dictate. All sales personnel utilize CRM software to track project activity.

Kennedy Industries employs 11 field service technicians on the road everyday handling start-ups, warranties, and field service maintenance contracts. Each vehicle is equipped with a hydraulic hoist and is fully stocked with mechanical and electrical parts to make on site repairs. We feel that our repair center and field service are second to none. More detailed information on our repair and field service capabilities is available by requesting our facilities survey.

Kennedy Industries also has a fleet of trucks and vehicles rising from a small four door Chevrolet Colorado to a sleeper

semi-truck that can pick up and deliver loads and pumps with excess length and weight. Kennedy

Industries has invested in this equipment to better serve our customers and to provide sole

source responsibility.

Kennedy Industries advancement into the water/wastewater treatment marketplace brings a value added approach to endusers, contractors and engineers. We supply, service, and repair products from end to end within the plant.

Future

Kennedy Industries continues to work our plan for careful, managed growth in sales volume for each of our principals and for increased profitability for both parties. We will strive to represent first class principals that have the ability to stay abreast of market requirements and have high quality products, competitive deliveries and pricing.

Facebook, LinkedIn and Twitter are a reality in our society that cannot be ignored. Kennedy is fully developing and maintaining Facebook, LinkedIn and Twitter accounts. This will allow us to reach the younger generation of industrial, commercial, water and wastewater professionals.

Over the past several years Kennedy has participated in committees working with young professionals and students. This allows us to build new relationships from the ground floor up. Kennedy Industries was awarded the new professional of the year award in 2010 for participation in the MWEA new professionals committee which we are very proud.

Kennedy is also developing new and exciting technologies that will allow us to provide our Customers with world class customer service. Kennedy has invested over \$1,000,000 in CNC machines, invested hundreds of thousands into computer systems, software, IT and equipment all to enhance our offerings to the Customer. Continuous improvement requires continuous investment.

Kennedy's future continued growth has required that we hire new specialized personnel. Kennedy Industries employs four (4) electrical engineer/controls specialists, one (1) mechanical engineer, one (1) information technologies specialists, five (5) CAD Solid works operators and increased support staff. These new hires are vital to expanding our offerings and capabilities that customers have demanded in the marketplace. Kennedy's business plan is to innovate faster than our competitors can try to duplicate.

Opportunities

Kennedy can provide complete coverage of the industrial and commercial, municipal, repair, field service and controls markets as follows:

CONSULTING ENGINEERS We pride ourselves on our specification work at the consulting engineer level. We continuously call on consulting engineers, working with them on recommendations, specification review, layouts and budget pricing. Lunchtime "brown bag" seminars are one tool we use to keep our name in front of engineers. In addition, we actively manage our CRM to insure we have visibility of all opportunities within our territory.

CONTRACTORS We view ourselves as very adept at working a job on bid day and providing our principals with the necessary feedback. Quite frankly, contractors like to do business with Kennedy Industries given our commitment to doing the right thing under challenging circumstances as well as our commitment to conducting business with integrity. Our level of service from order processing to start-up and commissioning is unmatched across all industries.

DIRECT SALES Direct sales and aftermarket sales is another area where we can increase our presence. We routinely call on water and wastewater treatment plants, both commercial and independent power stations, automotive plants, steel mills and chemical companies. We frequently participate in tabletop shows and belong to many of the local operator group organizations.

FIELD SERVICE In addition to our fully equipped repair facility, Kennedy has 11 full time field service vehicles on the road performing start-ups, preventive maintenance contracts and warranty work.

RENTAL Rental is a very important growth market for Kennedy. We currently supply rental pumps for bypass and dewatering to contractors end users alike. Our rental department includes pumps, panels and controls ranging from 2hp to 110hp. We also offer wireless alarming that will alert the contractor owner's personnel in the event of an equipment failure or malfunction. In 2017, we signed an agreement with Godwin to leverage both our strengths. Working together will help us both become dominate in the rental and bypass market.

TREATMENT Over the years Kennedy has grown our business by capturing a larger percentage of the markets "wallet". Another term often used at Kennedy is "another arrow in the quiver." We look to leverage our service capabilities and reputation in the industry to provide treatment products and services to our customers.

ENERGY AUDITS & ANALYSIS Maintenance funds are decreasing along with available manpower. Customers are looking like never before to decrease cost along with maintaining or improving services. Kennedy energy audits are designed to help the customer identify inefficient pumps that are wasting the customer's precious dollars. A partially clogged or worn out impeller can cost the customer over 50% in energy usage. This staggering amount can offer the customer a quick payback on a more efficient machine and reduce overtime costs along with improving safety of the customer's employees. Kennedy can also provide variable frequency analysis to help customers decide if a variable frequency drive can help save energy and improve the longevity of their equipment.

KENNEDY TECHNICAL PAPERS In August of 2011, Kennedy published its very first technical paper. Technical papers highlight projects and products that are problem solvers. These have become a great sales tool and help communicate various problem-solving ideas throughout the company and industries that we serve.

MONITORING AND CONTROLS It was a natural progression for Kennedy to become more involved in the monitoring, controls and SCADA portion of the business. Customers were having problems with control firms that knew nothing about pumps and systems as a whole. Kennedy, with its vast pump knowledge and with addition of controls engineers and controls trained service technicians hit the ground running. Customers now can make one call for technical support and service versus a plethora of various vendors that didn't always have the customer's best interest in mind. Currently, Kennedy can offer everything from pumping systems analysis, PLC programming, wireless web-based SCADA and everything in between.

APPRENTICE PROGRAM In 2010, Kennedy Industries instituted an apprentice program. Our main objective is to train the next generation and promote from within. Currently Kennedy has apprenticeship programs for all job classifications from machinists, mechanics, engineers, CAD/Solid works, customer service, inside and outside sales. This program pairs senior personnel with newly acquired employees to ensure that the apprentices of today become the senior leadership of tomorrow.

PLUS ONE PROGRAM In 2017, Kennedy Industries provided the very first "pumping as a service" project to the City of Fenton. This project provided the customer with a complete worry-free environment. Kennedy provided 14 pumps and maintenance for an agreed upon term and replaces them after term expiration with new pumps. The customer is invoiced annually so no budget busting repair is ever required.

MAINTENANCE CONTRACTS One of our true competitive advantages is our service capabilities. Kennedy currently provides maintenance contracts for over 180 stations across the state. Many of these contracts are on the eastern side of Michigan. The addition of Kennedy's Western Michigan office and shop will allow us to double this in the next few years.

PACKAGING Over the last 25 years, Kennedy has grown our business offering more products and services to the customer. In the past, Kennedy would supply two pumps and receive revenue accordingly. As time went on, we started providing two pumps and the control panel, then valves, telemetry, transfer switch, generators and SCADA. Revenue increased by double and triple in some areas. The customer push back with this practice at first was mixed. As time went on customers loved it as Kennedy was single source responsible for the entire station. No more customer pain with finger pointing upon multiple vendors. If it's broke, call Kennedy and they will fix it. Kennedy provides customers with a complete solution versus competitors that can only provide a portion. Kennedy will continue to add complimentary products and services to sustain growth and provide our customer with world class customer service.

EXTENDED WARRANTIES Extended warranties offer the customer piece of mind while also offering Kennedy with another signified revenue stream. This opportunity is a true win-win for the customer and Kennedy.

Strategy

Our marketing strategy is to aggressively promote products on various levels, concentrating on the following:

END USERS Creating a partnership with end users to achieve "trusted advisor" status is our main objective. This is accomplished by truly listening to the customers pain points and offering products and services to address the issue. Price is only a major factor when there is an absence of value. Kennedy specializes in solving customer's pain by increasing reliability, efficiency, longevity and most importantly, safety. Kennedy has invested in state-of-the-art field equipment so that we can measure current field conditions which allows us to analyze the load and offer a guaranteed solution. Our repair reports not only provide the customer with cause of failure, but what to do about it so that it doesn't happen again.

SMALL CONSULTING CIVIL ENGINEERS Small civil engineering firms typically do not have mechanical or electrical engineers on their design staff. When an opportunity arises for a water, wastewater treatment application or pump station, they will look for outside assistance. Kennedy can provide them with the technical assistance they need and fast.

MEDIUM TO LARGE CONSULTING ENGINEERS

We present products as a packaged, preengineered solution. Larger consulting firms are looking at all avenues to reduce their overall costs – including reducing staff and design costs. Kennedy has multidiscipline personnel that can provide a fast response to any inquiry.

CONTRACTORS Contractors represent a large portion of Kennedy's sales. We provide contractors with the highest level of customer service. Kennedy does the "little things" to make contractors lives easier. We process orders in house and make terms and conditions a smooth transaction. Many underground contractor's purchase orders are verbal, "get it going," which makes us an easy one stop experience. We handle the completion of submittals, order status, follow-up, release, invoicing, bonding, 0&M manuals, start up and owner training internally in a smooth and seamless fashion. Keeping contractors coming back time and time again is our number one priority.

INDUSTRIAL, WASTEWATER AND WATER SHOWS

Kennedy is an active participant in various shows throughout the year. We prominently feature our represented products and services at these shows. The joint expo show is our largest show where we purchase as many as 18 booths to truly exhibit our company and the fine principal that we represent. Local sectional shows often request Kennedy personnel to present to the attendees as we are highly respected by our customers in the industry.

POLITICIANS Many purchasing decisions are now in the hands of the township supervisors, city managers and council members. Kennedy often presents to these important decision makers at board meetings and political shows like the MTA (Michigan Township Association).

LUNCH AND LEARNS We have found "lunch and learns" to be a very effective tool in presenting new products to large groups of engineers and end users.

TARGETED MARKETING CORRESPONDENCES

Kennedy identifies key designers and decision makers and promotes products via sales calls, email and tech papers.

BUY AND TRYS When new products are available in the market many customers are apprehensive. Kennedy strives to be on the cutting edge of technology and always is willing to do 90 days try and buys to prove to the customer that the product is reliable and cost effective. We have found that once the product is installed it is purchased after the trial period has expired.

KENNEDY TRAINING To effectively promote our products and services, our sales staff must be knowledgeable in all aspects of our products and services. Kennedy will do whatever it takes to gain this knowledge from sending personnel to factory training, webinars and PowerPoint presentations designed to train our personnel to be the best in the industry.

CUSTOMER VISITS TO KENNEDY One of Kennedy's advantages is our state-of-the-art facility. We host industry meetings, events and offer training sessions. Kennedy receives numerous compliments on our true hands on training. Showing the customer firsthand the quality and attention to the smallest detail keeps our customers coming back again and again.

Charity

our part in the communities in which we do business. Over the past 20 plus years, Kennedy and its employees has devoted countless hours and financial support to those in need. Our commitment applies to our approach to business, but more importantly, the role we all have as citizens. Kennedy Industries is dedicated to giving back to enrich the lives of children and families in need. Spreading hope and joy through charitable activities is an integral part of our company's heritage.

REACHING HIGHER Kennedy provides two volunteer employees as mentors at Milford High School for the Reaching Higher program. Reaching Higher is a non-profit organization that's dedicated to helping young people live healthier, happier lives. Their character-building leadership training program inspires and prepares students to succeed and to reach their potential

ANGELMAN SYNDROME FOUNDATION WALK

Kennedy Industries supported a team walk and raised \$870.00 in pledges to aid the Angelman Syndrome Foundation. We walked to support "Team Kayla".

SEEDLINGS BRAILLE BOOKS BOWLING

Kennedy Industries was a program sponsor and participated in the Seedlings Braille Books for Children annual bowling for books event.

AMERICAN DIABETES ASSOCIATION, TOUR DE CURE

Kennedy Industries formed a team and biked 20 miles and raised \$1,200.00 to help the American Diabetes Association fund

GLEANERS. HUNGER FREE SUMMER FOOD NIGHT

Kennedy Industries participated in the annual Gleaners Community Food Bank "Summer Food Fight" to help southeast Michigan children fed once they lose access to school provided meals. \$ 849.00 in monetary donations were made and hundreds of pounds of food was donated.

SUSAN G. KOMEN 3-DAY WALK For the 2nd year in a row, Kennedy is proud to have had a walker participate in the Susan G. Komen 3-Day 60 mile walk also bringing a donation of \$2,600. Susan G. Komen is the world's largest breast cancer organization, and it's their mission to end breast cancer forever.

Mission Statement

- ▶ **It means** all Kennedy Industries team members fully understand that without the customer there is no Kennedy Industries.
- ▶ It means going the extra mile to make a good customer experience a great one with plus 1 service.
- ► It means responding to a customer in need at 2:00 am on Christmas Eve.
- ▶ **It means** effort, purpose, pride, and appreciation of the fact that the customer chose to call Kennedy Industries.

Our team commitment to the customer is the reason day after day, year after year, decade after decade that customers continue to bless us with their business.

It is often challenging, but the reward for a job well done is a customer calling again and again.

Kennedy Industries top priority will always be to provide the best product and service while never forgetting to be thankful and appreciative to the most important person —

THE CUSTOMER.

Proposed Work Plan Attachment C: Pump Repair Profile

PUMP REPAIR PROFILE

Calvin B. Kennedy founded our company over fifty years ago when he left his position as repair and service supervisor at Kerr Machinery Company. With \$102.00 in his pocket, he started Kennedy Industries Pump Repair in the back of a pickup truck. His dedication and integrity soon established Kennedy as a successful pump repair facility.

Today the company has grown to over 70 employees with an 80,000 sq. ft. repair facility that is dedicated to providing the customer with world class pump repair and customer service. The commitment to integrity and customer service is the same today as it was back then.

The following pages detail the process by which we repair the customer's pumps to ensure the highest efficiency and longest life to provide the best value in the industry. Kennedy also has a dedicated field service department that can remove and install your pump 24 hours a day 7 days a week.

We would be happy to provide you with a free estimate on your next repair.

Phone: (248) 684-1200 • Fax: (248)684-6011 www.kennedyind.com

SUBMERSIBLE PUMPS- REPAIR SPECIFICATIONS

After disassembly and cleaning of all components, a complete disassembly report is written detailing all parts required to bring your machine back to OEM specifications. The stator is also tested with our motor analyzer. We perform a surge test, a 2,000 VDC megger, and a winding resistance test in milliohms. EASA guidelines and OEM specs are met. A visual examination is also completed to check for mechanical wear patterns and compromised connections.

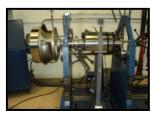

The stator is then baked in our dedicated bake out oven for a minimum of two hours at 250°F. This removes all moisture from the windings and insulation. After this process, the stator will be tested to quidelines listed above.

All worn parts are replaced with new parts or are restored to OEM specifications by certified welding, hard chrome plating, tungsten carbide coating, machining, precision grinding, seal face lapping, or many of our other in-house processes.

Prior to assembly, the seal faces are lapped in-house to within two lightbands of flatness. The final product is Opti-flat verified.

After the rotating assembly is constructed with all components, total indicator runout is verified at less than .003" on critical faces and diameters. The rotor is then dynamically balanced to 4W/N. Our balance stand has a sensitivity of 20 Microinches and a capacity of 10,000 lbs.

After assembly, the pump is air tested at 6 PSI for one hour then test run and checked for AMP draw, phase balance, and vibration. The pump is then coated with an epoxy based paint.

We also offer state of the art ceramic coatings to increase efficiency and to protect against erosion and cavitation damage. Our technicians are trained by 3M in surface preparation and application. Kennedy Industries, Inc. is also an authorized Flygt Distribution and repair facility.

HORIZONTAL PUMPS - REPAIR SPECIFICATIONS

Once your pump is checked in at our shop, photos are taken, and external details such as seal flush and coupling position are recorded.

During disassembly, we will inspect for and note visual wear, foreign objects, damaged, cracked, or broken components.

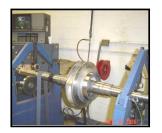

Cleaning consists of a spherical crowned glass bead blast on fabricated and cast components in our 30' blast booth. Bearing housings are pressure washed, and shafting is polished with 400 grit emery cloth. This process prepares all surfaces for an accurate inspection, and allows us to easily spot defects.

After a micrometer and run out inspection, worn parts are replaced with new, or restored by welding, chrome plating, tungsten carbide coating, or precision grinding. Line boring internal casing fits can also reduce vibration amplitudes, and improve sealing of rings, bushings, and packing leak off control. Our three CNC centers manufacture parts up to 36" X 120".

The impeller is then assembled to the pump shaft and mounted on roller bearings. Total indicator run out is verified at less than .003" on critical diameters to verify concentricity and trueness. The rotor is then dynamically balanced to 4W/N to ensure smooth performance. Our two computerized balancing stands have a sensitivity of 20 micro inches and a capacity of 10,000 lbs.

Once our processes are complete, all components undergo a final cleaning and quality control inspection. This process verifies that precision fits, running clearances, and shaft straightness meet or exceed OEM specifications. A careful assembly addresses radial and axial impeller position, thrust, and free rotation.

Once assembly is complete, a final check list will be completed to confirm your pump is built properly. We then paint or protect all external surfaces. We also offer ceramic coatings, mechanical seal conversions, and several other upgrades.

Our fleet of trucks can deliver up to 52' loads.

VERTICAL TURBINE PUMPS - REPAIR SPECIFICATIONS

Prior to disassembly, dimensions such as length, discharge size, and shaft extension will be measured. Photos are taken, and the rotor end float will be recorded and checked for free rotation. During disassembly, we will inspect for and note visual wear, foreign objects, damaged, cracked, or broken components.

Cleaning consists of a spherical crowned glass bead blast on fabricated and cast components in our 30' blast booth. Bearing housings are pressure washed, and shafting is polished with 400 grit emery cloth.

After a micrometer and run out inspection, worn parts are replaced with new, or restored by welding, chrome plating, tungsten carbide coating, or precision grinding. Our three CNC turning centers can manufacture parts up to 36" X 120".

Once our processes are complete, all components undergo a final quality control inspection. This process verifies that precision fits, running clearances, and straightness of all shafts meets or exceeds OEM specifications.

Each impeller is then assembled to a balance arbor and mounted on roller bearings. Total indicator run out is verified at less than .003" on critical diameters to verify concentricity and trueness. Collets and hardware are match marked for repeatability.

The impellers are then dynamically balanced to 4W/N to ensure smooth performance.

Our two computerized balancing stands have a sensitivity of 20 micro inches, and a capacity of 10,000 lbs.

Once assembly is complete, a final check list will be completed to confirm your pump is built properly. We then paint or protect all external surfaces. We also offer Tar-Set, and several other special coatings. Our fleet of trucks can deliver up to 52' loads.

SEWAGE PUMPS - REPAIR SPECIFICATIONS

Once your pump is checked in at our shop, photos are taken, and external details such as seal flush and coupling run out are recorded. We then begin disassembly, where we will inspect for and note visual wear, foreign objects, damaged, cracked, or broken components.

Cleaning consists of a spherical crowned glass bead blast on cast components in our 30' blast booth. Bearing housings are pressure washed and shafting is polished with 400 grit emery cloth. This process allows us to easily spot mechanical wear and erosion in the volute, impeller and shaft.

After a micrometer and run out inspection, worn components are replaced with new, or restored by welding, chrome plating, tungsten carbide coating, or precision grinding. We also offer protective coatings, such as ceramic overlays that restore surfaces and increase efficiency. Our three CNC centers manufacture parts up to 36" X 120".

The impeller is then assembled to the pump shaft and mounted on roller bearings. Total indicator run out is verified at less than .003" on critical diameters to verify concentricity and trueness. The rotor is then dynamically balanced to 4W/N to ensure smooth performance. Our two computerized balancing stands have a sensitivity of 20 micro inches and a capacity of 10,000lbs.

After our processes are complete, all components undergo a final cleaning, hydro test and quality control inspection. This process verifies that precision fits, running clearances, and shaft straightness meet or exceed OEM specifications. A careful assembly addresses radial and axial impeller position, thrust, and free rotation.

Once assembly is complete, a final check list will be completed to confirm your pump has been built properly. We then paint or protect all external surfaces. Kennedy also offers mechanical seal conversions, bearing isolators, special coating and several other upgrades to ensure long service life.

Phone: (248) 684-1200 • Fax: (248)684-6011 www.kennedyind.com

CIRCULATING PUMPS - REPAIR SPECIFICATIONS

Prior to disassembly, details such as length, flush plan, and shaft extension will be documented. Photos are taken, and the rotor end float will be recorded, and checked for free rotation. During disassembly, we will inspect for and note visual wear, foreign objects, damaged, cracked, or broken components.

Cleaning consists of a steel shot blast on fabricated and cast components or glass bead when warranted in our 30' blast booth. Bearing housings are pressure washed, and shafting is polished with 400 grit emery cloth. This process takes the components to bare metal, which allows an accurate inspection.

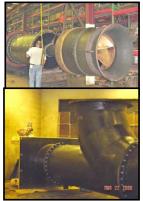

After a micrometer, NDE, and run out inspection, worn parts are replaced with new or restored. Some of our processes include welding, chrome plating, tungsten carbide and metal spray coatings. Our three CNC turning centers can manufacture parts up to 36" X 120".

After run outs are verified at less than .003", the impeller is then dynamically balanced to ISO grade 6.3 to ensure smooth performance. Our two computerized balancing stands have a sensitivity of 20 micro inches, and a capacity of 10,000lbs.

Prior to assembly, all components undergo a final quality control inspection. This process verifies that precision fits, running clearances, finishes, and straightness of all shafts meets or exceeds OEM specifications.

Once assembly is complete, a final check list will be completed to confirm your pump is built properly. We then paint or protect all external surfaces. We also offer bitumastic coal tar epoxy, ceramic, and several other coatings. Our fleet of trucks can deliver up to 52' loads.

Kennedy Industries can offer on-site technical assistance. Our friendly and knowledgeable reps can assist with all steps, such as setting lift, alignment, packing, and mechanical seals. We can also assist with start up and baseline performance checks.

END SUCTION PUMPS - REPAIR SPECIFICATIONS

Once your pump is checked in at our shop, photos are taken and external details such as seal flush, coupling position, thrust, and shaft run out are recorded.

During disassembly, we will inspect for and note visual wear, foreign objects, and damaged, cracked, or broken components.

Cleaning consists of a spherical crowned glass bead blast on cast components. Bearing housings are pressure washed, and shafting is polished with 400 grit emery cloth. This process prepares all surfaces for an accurate inspection, and allows us to easily spot defects. We also carefully examine the impeller and volute casings as they are the heart of the pump.

After a micrometer, NDE (nondestructive examination), and shaft run out inspection, worn parts are replaced with new, or restored by welding, chrome plating, tungsten carbide coating, or precision grinding. Our three CNC turning centers can accurately machine complex surfaces, and manufacture parts up to 36" X 120".

The impeller is then assembled to the pump shaft and mounted on roller bearings. Total indicator run out is verified at less than .003" on critical diameters to verify concentricity and trueness. The rotor is then dynamically balanced to 4W/N to ensure smooth performance. Our two computerized balancing stands have a sensitivity of 20 micro inches and a capacity of 10,000lbs.

Once our processes are complete, all components undergo a final cleaning and quality control inspection. This process verifies that precision fits, running clearances, and shaft straightness meet or exceed OEM specifications. A careful assembly addresses radial and axial impeller position, thrust, and free rotation.

Once assembly is complete, we will air test your pump for one hour to ensure it is leak free. A final check list will be completed to confirm your pump is built properly. We then paint or protect all external surfaces. We also offer ceramic coatings, mechanical seal conversions, and several other upgrades to ensure long life.

Phone: (248) 684-1200 • Fax: (248)684-6011 www.kennedyind.com

BOILER FEED PUMPS - REPAIR SPECIFICATIONS

Prior to disassembly, photos are taken and we record radial lifts, rotor float, and external dimensions. Impellers and channels are glass bead blasted, followed by a visual, dimensional, A/B Gap, NDE, and T.I.R. inspection.

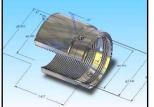

Processes include welding, chrome plating, tungsten carbide, CNC, and precision grinding. Careful attention is paid to stack ups, concentricity, perpendicularity, flatness, fits, clearances, and shaft straightness.

Design and layout are completed with state of the art solid modeling to ensure accuracy, and impeller centralization. We can also restore all external components to ensure field assembly and start up are problem free.

Prior to assembly, all components undergo a 3000 psi cleaning to remove machining chips and grit. Each part is put through a triple Q.C. process to ensure OEM specifications are met or exceeded. Quality is our top priority.

After an individual balance, the rotor is assembled with all components, and total indicator run out is verified at less than .002" on all critical diameters. We can dynamic balance to 2W/N to ensure a reliable and smooth running pump.

A careful assembly verifies precise impeller centralization at each stage. Our test stand confirms free rotation. These projects involve meticulous details. Our skilled technicians can team up with your staff for final assembly.

NICK BARAN 734-794-6426 nbaran@a2gov.org

WE ARE PLEASED TO PROPOSE THE FOLLOWING FOR YOUR CONSIDERATION:

CUST	OMER REF/PO#	JOB TITLE	SLP	SHIPPING TYPE
2	2020-00000587	BARTON PS, PUMP #4, DELVAL, PUMP, WATER	REA/CRB	FIELD SERVICE
QTY	DESCRIPTION			

THE FOLLOWING QUOTE IS FOR THE COST OF LABOR AND MATERIALS FOR THE ABOVE REFERENCED PUMP.

ESTIMATED NEW PARTS REQUIRED:

- (2) THRUST BEARINGS
- (1) RADIAL BEARING
- (1) SET OF O-RINGS
- (4) SNAP RINGS
- (2) SET OF PACKING
- (2) PACKING SLEEVES REPAIR
- (1) CASTING GASKET
- (1) SUCTION GASKET
- (1) DISCHARGE GASKET
- (1) SET OF FITTINGS
- (1) SET OF FASTENERS
- (1) IMPELLER KEY STAINLESS STEEL
- (1) KIT POLYMER STEEL
- (2) KITS CERAMIC COATING

ADDITIONAL PARTS REQUIRED:

(2) DEADING ICOLATODS LIDODA

- (2) BEARING ISOLATORS UPGRADE
- (1) BEARING LOCKNUT
- (1) BEARING LOCKWASHER
- (2) FLINGERS
- (1) END COVER GASKET

ESTIMATED LABOR REQUIRED:

DISASSEMBLE COMPLETE PUMP.

SANDBLAST COMPONENTS AND PREP FOR INSPECTION.

DIMENSIONALLY MEASURE ALL OPERATING CLEARANCES AND RECORD ON INSPECTION REPORT.

CERAMIC COAT INSIDE OF ENTIRE CASE TO RESTORE THE SURFACE.

ASSEMBLE ALL ROTATING PARTS ON SHAFT AND PLACE IN BALANCING MACHINE.

VERIFY T.I.R.'S THEN DYNAMICALLY BALANCE ROTOR TO 4W/N.

QUOTATION					
DATE	NUMBER	PAGE			
3/24/2020	0030627	2 of 3			

QTY DESCRIPTION

ASSEMBLE ROTATING ELEMENT WITH NEW PARTS LISTED.

INSTALL ROTOR IN PUMP CASING THEN ASSEMBLE COVERS WITH GASKETS AND PINS.

TORQUE COVER BOLTS TO PROPER SPECIFICATIONS.

INSTALL BEARING HOUSINGS.

ADJUST BEARING HOUSINGS TO PROVIDE FREE ROTATION AND PROPER THRUST.

PAINT THEN PRESERVE PUMP FOR FIELD SERVICE INSTALLATION

ADDITIONAL LABOR REQUIRED:

PREP MACHINE SHAFT FOR HARD CHROME PLATING AT 1 ISOLATOR JOURNAL.

CHROME PLATE JOURNAL THEN GRIND TO OEM SPECIFICATIONS.

METAL SPRAY CASE RING OD'S FOR PROPER CLEARANCE TO THE CASE ID'S.

PREP MACHINE SHAFT SLEEVES FOR HARD CHROME PLATING.

CHROME SHAFT SLEEVES THEN GRIND TO OEM SPECIFICATION.

LAP COUPLING TO SHAFT FOR A MINIMUM OF 85% CONTACT.

APPLY POLYMER STEEL TO STUFFING BOX ID'S AND MACHINE TO RESTORE CONCENTRICITY.

ESTIMATED REPAIR COST: \$12,250.00

ADDITIONAL REPAIR COST: \$3,735.00

TOTAL REPAIR COST: \$15,985.00

DELIVERY: 4 WEEKS (AFTER RECEIPT OF ORDER)

QUOTATION				
DATE	NUMBER	PAGE		
3/24/2020	0030627	3 of 3		

QTY DESCRIPTION

THE FOLLOWING QUOTE IS FOR FIELD SERVICE REQUIRED ON YOUR ABOVE REFERENCED PUMP STATION:

FIELD SERVICE LABOR REQUIRED:

KENNEDY INDUSTRIES WILL PROVIDE (2) FIELD SERVICE TECHNICIAN(S) ONSITE TO REMOVE YOUR DELAVAL PUMP AND TRANSPORT IT TO OUR WIXOM LOCATION.

KENNEDY INDUSTRIES WILL PROVIDE (2) FIELD SERVICE TECHNICIAN(S) ONSITE TO INSTALL YOUR REPAIRED DELAVAL PUMP, STARTUP AND TEST RUN TO VERIFY PROPER OPERATION.

TOTAL FIELD SERVICE COST: \$9,564.00. COST WENT UP \$1,834.00 TO COVER SKY TRACK RENTAL. IF SKY TRACK RENTAL IS NOT NEEDED FOR INSTALL, TOTAL FIELD SERVICE COST: \$8,647.00

TOTAL REPAIR COST: \$15,985.00

TOTAL FIELD SERVICE COST: \$9,564.00

TOTAL COST: \$25,549.00

DELIVERY: 4 WEEKS (AFTER RECEIPT OF ORDER)

PLEASE PROVIDE WRITTEN OR VERBAL AUTHORIZATION SO THAT WE MAY RESPOND TO YOUR REQUIREMENTS.

IF YOU HAVE ANY QUESTIONS, COMMENTS, OR ARE IN NEED OF ANY ADDITIONAL INFORMATION PLEASE FEEL FREE TO CONTACT ME AT (248) 684-1200.

SINCERELY,

MIKE HORN REPAIR CENTER MANAGER MHORN@KENNEDYIND.COM

JN/CRB cc:REA

CREDIT CARD PAYMENTS ARE SUBJECT TO AN ADDITIONAL 3% CHARGE NO TAXES OF ANY KIND ARE INCLUDED IN THIS PROPOSAL

TOTAL: \$25,549.00

Proposed Work Plan Attachment E: Sample As Found Condition Report

March 24, 2020

Mr. Nick Baran City of Ann Arbor 1010 W. Huron River Dr Ann Arbor, MI 48103

RE: Delaval Barton Station Water Pump #4

Serial Number: 253683

Customer Reference Order #: 2020-0000587

Kennedy Industries #: 103693

Mr. Baran:

Attached are photos with descriptions of the parts in need of repair or replacement. If you have any questions, please do not hesitate to contact us.

Sincerely,

Mike Horn

Repair Center Manager KENNEDY INDUSTRIES, INC.

PUMP

- Pump at disassembly.
- Pump spun tight at disassembly.

IMPELLER

- Impeller rings show little to no wear.
- Impeller is in good condition and will be reused.

CASE RINGS

- Case ring ID to impeller ring OD clearances are .024, specification is .022-.024.
- Case ring OD to case ID clearances are over .050, specification is .002-.005.
- Case ring OD's will be metal sprayed and machined to restore proper clearance to the case ID.

- · Packing sleeve OD's are slightly worn.
- Packing sleeves will be machine prepped, hard chrome plated, and precision ground to restore proper size and finish.

SHAFT

- Shaft is scored at the TE isolator fit.
- Shaft will be machine prepped, hard chrome plated, and precision ground to restore proper size and finish.

CASE

- · Case internal surfaces are pitted and eroded.
- Polymer steel will be applied to stuffing box ID's and machined to restore concentricity.
- All other case internal surfaces will be ceramic coated to help prevent further erosion.

BEARINGS

- Bearings were contaminated with water and dirt.
- Bearing housings will be upgraded to isolators and bearings will be replaced with new.

COUPLING

- Tapered coupling bore has only 40% contact with the shaft.
- Coupling bore will be lapped to the shaft for a minimum of 85% contact.

ATTACHMENT B CITY OF ANN ARBOR DECLARATION OF COMPLIANCE

Non-Discrimination Ordinance

The "non discrimination by city contractors" provision of the City of Ann Arbor Non-Discrimination Ordinance (Ann Arbor City Code Chapter 112, Section 9:158) requires all contractors proposing to do business with the City to treat employees in a manner which provides equal employment opportunity and does not discriminate against any of their employees, any City employee working with them, or any applicant for employment on the basis of actual or perceived age, arrest record, color, disability, educational association, familial status, family responsibilities, gender expression, gender identity, genetic information, height, HIV status, marital status, national origin, political beliefs, race, religion, sex, sexual orientation, source of income, veteran status, victim of domestic violence or stalking, or weight. It also requires that the contractors include a similar provision in all subcontracts that they execute for City work or programs.

In addition the City Non-Discrimination Ordinance requires that all contractors proposing to do business with the City of Ann Arbor must satisfy the contract compliance administrative policy adopted by the City Administrator. A copy of that policy may be obtained from the Purchasing Manager

The Contractor agrees:

- To comply with the terms of the City of Ann Arbor's Non-Discrimination Ordinance and contract compliance (a) administrative policy.
- To post the City of Ann Arbor's Non-Discrimination Ordinance Notice in every work place or other location in (b) which employees or other persons are contracted to provide services under a contract with the City.
- To provide documentation within the specified time frame in connection with any workforce verification, (c) compliance review or complaint investigation.
- To permit access to employees and work sites to City representatives for the purposes of monitoring (d) compliance, or investigating complaints of non-compliance.

The undersigned states that he/she has the requisite authority to act on behalf of his/her employer in these matters and has offered to provide the services in accordance with the terms of the Ann Arbor Non-Discrimination Ordinance. The undersigned certifies that he/she has read and is familiar with the terms of the Non-Discrimination Ordinance, obligates the Contractor to those terms and acknowledges that if his/her employer is found to be in violation of Ordinance it may be subject to civil penalties and termination of the awarded contract.

ATTACHMENT C CITY OF ANN ARBOR LIVING WAGE ORDINANCE DECLARATION OF COMPLIANCE

The Ann Arbor Living Wage Ordinance (Section 1:811-1:821 of Chapter 23 of Title I of the Code) requires that an employer who is (a) a contractor providing services to or for the City for a value greater than \$10,000 for any twelvementh contract term, or (b) a recipient of federal, state, or local grant funding administered by the City for a value greater than \$10,000, or (c) a recipient of financial assistance awarded by the City for a value greater than \$10,000, shall pay its employees a prescribed minimum level of compensation (i.e., Living Wage) for the time those employees perform work on the contract or in connection with the grant or financial assistance. The Living Wage must be paid to these employees for the length of the contract/program.

Companies employing fewer than 5 persons and non-profits employing fewer than 10 persons are exempt from compliance with the Living Wage Ordinance. If this exemption applies to your company/non-profit agency please check here [___] No. of employees___

The Contractor	ог	Grantee	agrees
----------------	----	---------	--------

(a)	To pay each of its employees whose wage level is not required to comply with federal, state or local prevailing wage law, for work covered or funded by a contract with or grant from the City, no less than the Living Wage. The current Living Wage is defined as \$14,05/hour for those employers that provide employee health care (as defined in the Ordinance at Section 1:815 Sec. 1 (a)), or no less than \$15.66/hour for those employers that do not provide health care. The Contractor or Grantor understands that the Living Wage is adjusted and established annually on April 30 in accordance with the Ordinance and covered employers shall be required to pay the adjusted amount thereafter to be in compliance with
	Section 1:815(3).

Check the applicable box below which applies to your workforce
Employees who are assigned to any covered City contract/grant will be paid at or above the applicable living wage without health benefits
Employees who are assigned to any covered City contract/grant will be paid at or above the applicable living wage with health benefits

- (b) To post a notice approved by the City regarding the applicability of the Living Wage Ordinance in every work place or other location in which employees or other persons contracting for employment are working.
- (c) To provide to the City payroll records or other documentation within ten (10) business days from the receipt of a request by the City.
- (d) To permit access to work sites to City representatives for the purposes of monitoring compliance, and investigating complaints or non-compliance.
- (e) To take no action that would reduce the compensation, wages, fringe benefits, or leave available to any employee covered by the Living Wage Ordinance or any person contracted for employment and covered by the Living Wage Ordinance in order to pay the living wage required by the Living Wage Ordinance.

The undersigned states that he/she has the requisite authority to act on behalf of his/her employer in these matters and has offered to provide the services or agrees to accept financial assistance in accordance with the terms of the Living Wage Ordinance. The undersigned certifies that he/she has read and is familiar with the terms of the Living Wage Ordinance, obligates the Employer/Grantee to those terms and acknowledges that if his/her employer is found to be in violation of Ordinance it may be subject to civil penalties and termination of the awarded contract or grant of financial assistance.

ATTACHMENT D

VENDOR CONFLICT OF INTEREST DISCLOSURE FORM

All vendors interested in conducting business with the City of Ann Arbor must complete and return the Vendor Conflict of Interest Disclosure Form in order to be eligible to be awarded a contract. Please note that all vendors are subject to comply with the City of Ann Arbor's conflict of interest policies as stated within the certification section below.

If a vendor has a relationship with a City of Ann Arbor official or employee, an immediate family member of a City of Ann Arbor official or employee, the vendor shall disclose the information required below.

- No City official or employee or City employee's immediate family member has an ownership interest in vendor's company or is deriving personal financial gain from this contract.
- 2. No retired or separated City official or employee who has been retired or separated from the City for less than one (1) year has an ownership interest in vendor's Company.
- 3. No City employee is contemporaneously employed or prospectively to be employed with the vendor.
- 4. Vendor hereby declares it has not and will not provide gifts or hospitality of any dollar value or any other gratuities to any City employee or elected official to obtain or maintain a contract.
- 5. Please note any exceptions below:

Conflict of Interest Disclosure*		
Name of City of Ann Arbor employees, elected officials or immediate family members with whom	() Relationship to employee	
there may be a potential conflict of interest.	() Interest in vendor's company () Other (please describe in box below)	
Nove		

*Disclosing a potential conflict of interest does not disqualify vendors. In the event vendors do not disclose potential conflicts of interest and they are detected by the City, vendor will be exempt from doing business with the City.

I certify that this Conflict of Interest Disclosure has been examined by me and that its contents are true and correct to my knowledge and belief and I have the authority to so certify on behalf of the Vendor by my signature below:
