Subject: Re: City of Ann Arbor Planning Commission Working Session

Folks,

In case it's helpful for discussion of the second item tonight, [here's a link](#) to the latest iteration of A2Zero (3.0). I skimmed it again this morning to refresh my memory on the actions, and which entities were tasked with them. Much of what we have been discussing on electrification / solar / EVs relates to the actions within Strategies 2 & 3. We / Planning appear as the "responsible party" or "collaborator" on a number of actions, especially in Strategy 4.
