Meeting Minutes
Public Market Advisory Commission

Wednesday, February 11, 2015 **5:00 PM** **Larcom City Hall, 301 E Huron St, Basement, conference room**

Work Session

CALL TO ORDER

Present: 5 - David Santacroce, Aimee Germain, Jillian Lada, Karlene Goetz, and Peter Woolf

WS WORK SESSION

WS-1 15-0161 Architectural Firm Presentations

WS-2 Architectural Firm Presentation: Kohler Architects

Questions for Kohler Architects:
- How will this design handle truck and pedestrian flow?
- How would winter roll down sides relate to the position of vendor vehicles?
- What is the implication of removing the current vehicle pass through/turn around location?
- Is anything preventing the design from incorporating a two-story structure?
- Design seemed small for an event space – would a second story help with that and also provide desired community space?
- Was any thought given to changing the structure of the lot?

WS-3 Architectural Firm Presentation: Mitchell and Mouat Architects

Questions for Mitchell & Mouat Architects:
- Is consideration given to the construction schedule for the market improvements in relationship to any planned updates to the streets adjacent to the market (Detroit Street, 5th and 4th Avenues)?
- How would the winterization doors work? Would they be fixed or move?
- Can you talk about your vision for what a building on the site would look like?

PUBLIC COMMENT - GENERAL (3 MINUTES EACH)

Daren Otis, Market Vendor, expressed concern for the effect of losing the vehicle pass through between two sides of the market parking lot. Questioned truck maneuverability and pedestrian traffic flow if the current space between the short middle market aisle and the sand lot stall spaces is eliminated.

ADJOURNMENT
