NEW BUSINESS

- CIP Committee
 - UT-ST-16-02 Allen Creek Railroad Berm Opening (Depot St Tunnel)
 - Be it resolved: The Ann Arbor Public Art Commission recommends that CIP project UT-ST-16-02 Allen Creek Railroad Berm Opening (Depot St Tunnel) has potential for enhancement in the following way: provide a better tunnel experience through art and design to enliven the route, help users to feel safer and more confident, provide unexpected delights, educate or artfully provide wayfinding via surface treatment to the tunnels interior, entry elements, lighting, color, etc. A proposed budget range of \$40K - \$80K is recommended. (Simpson / Smith)

Tunnel under Depot St railroad between Broadway Bridge and Main (1/3 way down near the edge of JJR). Path will go under train tracks. This path will help alleviate flooding in this area. Greenway and border to border trail is multi faceted. This area is a natural storm channel and when redesigned will reduce flooding on eastside of Main and will allow for safe pedestrian travel. MI State Police came to City with FEMA money that is currently unspent. City has the pedestrian portion already in the budget. Currently in the design phase. Artwork at the tunnel could attract

others to produce art in other locations along the railway.

Approved as presented

OLD BUSINESS

None
