Approved comments read as follows:

Design Review Board Comments

1. Comments on overall design

Appearance is more suitable for this area of downtown; colors and materials have been simplified to focus more on the form than a patchwork of color; the new, lighter color brick is too plain. Some detail should be brought into the lighter brick areas to avoid a monoplane surface. Higher end materials are encouraged for the base, entry, corner tower, cap, and focal points.

Some members preferred original colors; some preferred new colors. Landscaping has been improved; benches might help.

Overall appearance has been cleaned up.

2. Specific comments

*Explore the retaining wall area on back side of building to ensure safety.
Consider landscaping material in this area.*

*Awnings should come out further. The awnings could be more artistic
and hung from above which would allow them to be deeper.*

Panels at the corner read better.

Louvers under the windows work better.

Signage is better

*Recommend green planters in a number of locations to bring color into
the building.*

G-2 [20-1367](#) Process to Amendments to Design Guidelines

Attachments: DesignGuidelines[1].pdf

*The Design Review Board discussed making changes to the Design
Guidelines as well as development review as it relates to required LEAD
certification.*

H COMMUNICATIONS TO THE DRB
