Resolution to Amend Grant Agreement with the US Department of Energy for Energy Efficiency and Conservation Block Grant (EECBG) Project (\$1,243,400.00 Federal Funds)

The attached resolution authorizes an amendment to the City's grant agreement with the US Department of Energy (DOE) to remove \$228,000.00 in local matching fund requirements from the \$1,243,400.00 three-year Energy Efficiency and Conservation Block Grant (EECBG) project to improve energy efficiency and reduce energy use and fossil fuel emissions.

The original contract with DOE was approved by City Council in resolution R-09-501 on December 21, 2009, and included \$228,000.00 in local matching funds from the City's Metro Expansion Fund for the purchase of LED streetlights. In order to provide more flexibility in administering the grant and meeting the City's budget needs, Energy Office staff worked with DOE on a contract amendment to remove the matching fund requirement.

City staff still anticipate using local funds to pay for additional LED streetlights and for the installation of the new LEDs purchased under this grant. However, installation is not an approved activity under the grant, and staff wishes to preserve maximum flexibility in the administration and expenditure of local funds.

This amendment does not in any way change the scope of this grant.

The Energy Office will continue to provide grant management services for this grant.
