Resolution to Approve Amendment No. 1 to Agreement Between the Sanborn Map Company, Inc. and the City of Ann Arbor for Geographic Information Systems (GIS) Data Development (Amendment \$10,275.00/Total Project Not to Exceed \$31,991.00)

The attached resolution requests authorization to amend the Professional Services Agreement with Sanborn Map Company, Inc. (Sanborn) for GIS data development.

The City of Ann Arbor's stormwater rates are based on the impervious area of parcels. The calculation of the city's impervious area is determined by collecting aerial infrared photography and using the data to develop ortho-images that are incorporated into the city's GIS. This aerial photography and data development was last collected in 2007. In order to accurately capture impervious area and periodically adjust stormwater rates, the aerial ortho-imagery must be updated on a routine basis.

On January 20, 2009, the City of Ann Arbor published an Invitation to Bid (ITB #3990) to collect the aerial photographs and develop the data into an ortho-imagery format compatible with the City's GIS. Of the five bids received, Sanborn was the lowest bidder. On March 2, 2009, the City of Ann Arbor awarded a contract to Sanborn to collect the aerial photographs (\$21,716). The City delayed approval of the ortho-imagery data development phase until the aerial photographs were collected and found acceptable for data development.

Sanborn has collected the aerial photographs, and the City finds them acceptable and ready for data development. As such, the current contract with Sanborn must be amended to include the data development phase of the project. The proposed amendment will increase the cost of the Sanborn contract and project budget by \$10,275.00, for a not-to-exceed project total of \$31,991.00. The \$10,275.00 needed for this amendment is available in the FY2010 Information Technology Fund (Fund 0014) Operating Budget.

Sanborn received Human Rights approval on January 14, 2009, and complies with the Living Wage Ordinance.
