Whereas, The WWTP requires significant improvements due to the age and condition of plant equipment, and throughout the process of upgrading its facilities needs to maintain effluent quality;

Whereas, Replacing the weir troughs in one final clarifier located in the West Plant will enable the WWTP to meet its current and future treatment capacity needs during the construction of plant improvements and avoid the risk of exceeding its discharge permit limits and associated potential fines;

Whereas, Proposals to remove, fabricate and install weir troughs on one final clarifier in the West Plant were solicited through RFP No. 559, and of the three proposals received and reviewed by WWTP staff, Monarch Welding & Engineering, Inc. was found to be the qualified responsible respondent with the lowest price quotation for this work; and

Whereas, Six local firms bid on the specified street tree pruning work that is needed in seven management units; of these seven units, three will be awarded to private firms, three will be pruned with in-house crews, and one unit (management unit 2) will not be pruned due to the high number of ash trees that show emerald ash borer infestation, which will likely need to be removed in the near future;
Whereas, In management unit 16, which contains 2,750 street trees in the area bounded by Washtenaw, E. Stadium, Packard and Hill Streets, commonly referred to as the Burns Park neighborhood, our lowest responsible bidder exceeds \$25,000.00 and thus requires City Council approval;

12 Council - April 7, 2003

Whereas, This is a very good value for the City of Ann Arbor, with an average estimated cost of only \$19.00 per tree, and where trees are fairly large in size and parking issues impede the progress of our in-house crews;

Whereas, Such contracting of street tree pruning is currently budgeted in the fiscal 2002-03 Park Maintenance and Repair Millage; and

RESOLUTION TO ADOPT AND IMPLEMENT A REVISED

COMMUNITY TELEVISION NETWORK PUBLIC

ACCESS CHANNEL POLICY MANUAL

Whereas, The City of Ann Arbor manages and operates what is now known as Community Television Network (CTN);

Whereas, CTN continues to provide "public access television services" in the form of television production training, television production equipment, and a public access cable television channel for the distribution of video programming provided by Ann Arbor citizens and non-profit agencies;

Whereas, The CCC and CTN management staff have determined that revising the CTN Public Access Channel Policy Manual into two separate documents is necessary, to be referred to as the "CTN Public Access Channel Policy Manual" and the "CTN Public Access Channel Procedures Manual", to create a more effective method for understanding the rules and regulations applicable to this service while providing the CCC and CTN management staff with more flexibility in revising procedural elements by not requiring City Council review for non-policy changes;

Whereas, Primary revisions to the CTN Public Access Channel Policy Manual and CTN Public Access Channel Procedures Manual include: (1) clarification that the program schedule for the CTN Public Access

Channel is determined by CTN staff; (2) a requirement to disclose certain content that may be unsuitable for viewing by children and/or is intended for a mature audience; (3) the creation of a revised "Viewer Comment Form" and new procedure for responding to viewer complaints regarding program content; Whereas, The CCC and CTN have developed a program scheduling plan that calls for scheduling programs submitted by Ann Arbor citizens and non-profit agencies into logically defined "blocks" intended to create improved program promotion opportunities and increase viewership; and Whereas, The CCC approved a motion unanimously at their November 26, 2002 business meeting to forward the "CTN Public Access Channel Policy Manual" and the associated "CTN Public Access Channel Procedures Manual" to City Council for their consideration and approval;

R-113-4-03 APPROVED

RESOLUTION TO PROTECT THE "CLEAN WATER ACT"

Whereas, The U.S. Army Corps of Engineers and the Environmental Protection Agency have requested public input regarding issues related to what waters are subject to Federal jurisdiction under the Clean Water Act (CWA) and other laws designed to protect the environment and particularly have requested public input regarding how "waters of the United States" shall be defined;

Whereas, Clean water is essential for drinking, for recreational, industrial, commercial, and agricultural uses and for aquatic life and wildlife;

Whereas, For 30 years, the Clean Water Act has played an essential role in protecting and restoring our nation's waterways;

Whereas, This progress would not have been possible if the Act had not applied to all our nation's waters,

Whereas, A more restrictive definition of the waters subject to the Clean Water Act would be detrimental to the health, safety, and welfare of the CITY OF ANN ARBOR for the following reasons:

A. Scientific studies repeatedly show the interconnectedness of surface waters, wetlands, and ground waters. Therefore, adequate protection of navigable waters relies on protection of non-navigable tributaries and adjacent wetlands; and

Council - April 7, 2003 31

B. Isolated wetlands provide essential groundwater recharge services. In recent years, Southeastern Michigan aquifer levels have been declining, negatively affecting the amount of water available for residential, commercial and industrial use; and

C. Smaller, isolated wetlands have been shown to provide as many ecological services to the Huron River Watershed as larger wetlands contiguous to water bodies; and

D. Flood control is dependent on proper management of the entire watershed draining to the Huron River; and

Whereas, Enforcement of water protection for isolated, ephemeral, non-navigable or adjacent water bodies at the state level, without federal support under the Clean Water Act, would be inadequate because:

1. Enforcement by the state of Michigan of existing water protection programs is under funded and regularly inadequate; and

2. Without the leverage provided by Clean Water Act requirements, state compliance with water protection rules would be much less likely to occur;

RESOLVED, That the City of Ann Arbor affirms that the definition of U.S. waters subject to the Clean Water Act should include, in addition to traditionally navigable waters, all non navigable tributaries, intermittent and ephemeral streams, waters that pass through man-made conveyances, and all wetlands whether or not

there is a visible connection to surface waters.

Council Member Johnson moved, seconded by Council Member Groome that the resolution be adopted. On a voice vote, Mayor Pro Tem Carlberg declared the motion carried.
