Resolution to Approve a Contract with Emergency Restoration Company for the Asbestos Abatement and Restoration of the 2nd Floor in the Guy C. Larcom City Hall Building (\$177,900.00) and to Appropriate Funds (\$75,000.00) **(8 Votes Required)**

We recommend your approval of the attached resolution authorizing a contract in the amount of \$177,900.00 with Emergency Restoration Company, for the removal of asbestos and the restoration of the 2nd floor of City Hall. This is the second of two phases to remove asbestos containing materials in City Hall. The first phase completed asbestos removal and restoration of floors 3, 4 & 5 in July of this year. Floors basement, 1, 6 & penthouse were abated in previous projects.

The funding for both phases of the abatement project was included in the amended General Fund Capital Budget amendment approved by City Council via #R-13-381. Completion of this project will exceed the original budget by approximately \$75,000.00. This is in part because of actual abatement costs and relocation costs being higher than the original estimates and two unanticipated issues that came up during the project. All of the HVAC duct insulation had to be removed as the overspray of fireproofing containing asbestos was much worse than expected. The other problem was that the pneumatic distribution system that controls the individual HVAC boxes on each floor was beyond repair and these boxes had to be converted to electronic controls.

Phase two of this project involves the removal and disposal (as hazardous materials) of the lighting, HVAC duct insulation and ceiling; abatement of accessible asbestos containing flooring and spray-on fireproofing above the ceiling; re-insulation of HVAC duct work; re-application of non-asbestos fireproofing materials; and the installation of new flooring and ceiling products. Air monitoring services are being bid separately and will be provided by a certified, independent outside firm. Installation of new light fixtures is being funded through the City's Energy Fund Loan Program as we improve the light levels and energy efficiency of the building. The lighting loan will be repaid from operating funds offset by energy savings from the new fixtures. Finishes (flooring, ceilings and lighting) will be consistent with the work done on the other floors of the building. This will also support our effort to

standardize finishes in the Ann Arbor Municipal Center (City Hall and Justice Center) location to minimize repair/replacement time and reduce material inventories.

The abatement and restoration work on the 2nd floor is expected to start shortly after the November 6, 2014 Council meeting and be finished prior to the first Council meeting in January, 2015. Alternative meeting space for City Council and other City Committees, Boards and Commissions has already been arranged and is being coordinated by the City's Communications Office.

The Clerk's Office and west hallway were previously abated during the Municipal Center Project. Normal operations of the Clerk's office will not be impacted by this project. Air monitoring by an outside firm and the City's Safety Manager will be ongoing in this area to ensure a safe environment for staff and the public.

Requests for bids for the proposed abatement and restoration work (lighting replacement will be handled as a separate bid/contract) were advertised and only one bid was received on August 5, 2014. Staff evaluated the bid and determined that the price was consistent with expectations and recommends that Emergency Restoration Company of Troy, MI, as the lowest responsible bidder, be awarded the contract.

The resolution recommends that the original project budget of \$1,000,000.00 be increased to \$1,075,000.00 to cover asbestos abatement, fireproofing, restoration (floors and ceilings), air monitoring, relocation and contingency for floors 2-5 of the Guy C. Larcom building. The resolution includes a recommended 10% project contingency of \$17,800.00 to cover potential contract change orders to be approved by the City Administrator if necessary.

Emergency Restoration Company received Human Rights and Living Wage approval on November 18, 2013.
