Subject: University Inn All-Electric Building

To the Planning Commission:

I've recently been informed that University Inn at 2424 East Stadium, on your meeting agenda for August 3, will be an all-electric building. Thank you to the developer for meeting the standards of the A2Zero plan and not using fossil fuel-based infrastructure. This is critical in reaching Ann Arbor's decarbonization goals. As an environmentalist and climate-concerned citizen, I would like to see more development like this. Please give this proposal every consideration at your August 3 meeting.

Thank you!
