

Dear Planning Commission,

I am writing in strong opposition to the Nov 2015 South Pond Villages Site Plan that will be discussed at your public hearing on the subject on 2/17. This plan would significantly impact the natural area that many people are trying to protect.

This revised plan fails to solve the problems of sufficient access to the site. The NovSite plan that would put a road called South Pond Way to the North, will make Huron river dr much more dangerous as it is.

There is not an area for pedestrians and/or bicycles and the road is in very bad condition making cars drive in between lanes or over the grass due to the lack of maintenance.

We have some accidents in the past and this additional traffic will generate new potential accidents.

This is only one topic but avoiding the fact that the site has endangered species and the building on protected wetlands is very disturbing. That will make me reconsider living in this city as well as to others that pay higher taxes to live in a community with more greener alternatives and I am not talking about money.

Best regards,

Ariel Nicolaci
