Subject: Notice of Meeting May 20,2017?

We received Notice of Public Hearing for a new construction by us with a past date of hearing and was dated June 5, 2017 to us and the hearing date says May 20, 2017????

Why would I get this after the date?
This proposal of 1140 Broadway Site is of great concern for the area.
There is so many residents already and the am and pm traffic is quite congested already.
I would think a study would be made of this and the issue of water and water pressure, and parking spots as well.

Are the residents going to be RE notified of the hearing ahead of time This is not CORRECT. We should have time to be notified of the meeting well before the meeting.

Please take action on this matter to let all the residents know of this issue.
