**Subject:** RE: 2060 W. Stadium

Chris & Brett

I wanted to let you know that we will be pulling our site plan at 2060 W. Stadium at this time. Contrary to the commissions views, financial institutions still need drive through's to accommodate the needs and desires of their customers in addition to being able to address the ongoing and possible future pandemics. It is very unfortunate that the planning commission does not see the benefit of having a business locate their regional headquarters in Ann Arbor. At this time our client is evaluating what they will do with the property and we will advise once they determine if they will resubmit another plan for the property. Thank you both for your assistance over the past year on this project.

Sean T. Havera  
VP of Construction
