

Re: 221-223 Felch St and 214 West Kingsley St 51 Unit Condo building public meeting Oct 21, 6:30PM - 8PM

Hi all,

I attended the subject information meeting last week and just wanted to express my strong support for this project. I think this project will significantly improve the neighborhood in many respects but most specifically by remediating a contaminated brown field site and mitigating stormwater flooding issues that currently plague the neighborhood. I was happy to hear that the current proposed plan also envisions a retaining wall and fencing along the eastern boundary of the N. Ashley street residences along with a greenbelt and underground retention for metered stormwater release. As this project works its way through the approval process, I hope you will view this project as favorably as I and many of my surrounding neighbors do.

Regards,
