

# Bryant Survey Draft

1. Are you interested in having a tree planted in your right-of-way? (Options: yes, no, unsure/undecided)
2. For what reasons would you want a tree planted? (Options: shade, aesthetics, flowers, wildlife attraction, carbon sequestration, other - fill in, none)
3. Will you be able to water the tree adequately or have a friend or neighbor assist you in doing so?
  - \* A newly planted tree will receive a total of twelve biweekly waterings from the contractor. Trees that are not yet established generally require 1 gallon of water per caliper inch per week.
4. How much do you feel you know about tree care?
  - \*Offer link to resources.
5. What concerns or reservations do you have about having a tree planted? (Options: none, leaf/debris clean-up, pruning/maintenance, structural damage to home, pollen/allergens, messy fruit, tree planting has been unsuccessful in my yard before [if so, what species?], other [fill in])
6. In general, what improvements could the forestry department make?
7. What aspects of city forestry are you satisfied with?
