Please do not approve this until someone has explained and justified the proposed price. It sounds absolutely

insane. If I had known that this kind of money was going to go to consultants for this kind of work, I would NEVER have supported it.

Please delay approval of this. I do not understand why this should cost so much. Can they or the Sustainability people explain and justify it in detail? I would not have supported this activity if I had known about the size of these consultant fees. I have read the RFP and some of the proposals and it does not make sense.

It's on the Consent Agenda which is sort of a rubber stamp process. Please get these contracts out into the open.

I was happy to see this resolution on the agenda. But I understand it has now been pulled because one of the sponsors asked for it to be pulled. I would like to know which sponsor pulled it and why.
