Good afternoon,

Please find attached to this email my resignation letter from the Ann Arbor Energy Commission. I am very thankful to have been considered and chosen as an Energy Commissioner, however, my personal and professional responsibilities are precluding me from participating as much as I would like as an Energy Commissioner. I am very passionate about energy and I hope that I can find some ways to continue to leverage my 25 years and counting of energy and power generation experience to help my city achieve fair, cost effective and sustainable energy solutions. Please reach out to me with questions as you would like on various topics, and I will look for opprotunties where I can contribute in different ways for the city. Thank you all!

Teresa Hatcher
