

Notes from the Chair, June 2017

Hello all.

First, thanks to those who took the time to answer the Survey Monkey. You can find the results here

<https://www.surveymonkey.com/results/SM-L797JHLP/>

There will be more surveys, and if you have suggestions for a topic please contact me.

This month we continue to have guests and presentations, and more training for us. We will be taking on more issues and decision-making. Please be in touch with Kayla with specific concerns and also questions.

For this meeting, we've built in some time for discussion and questions. It is still very limited. Please let me know after the meeting how this worked for you.

We are looking at the work plan for addressing Pedestrian Safety in October. We need some guidance on what you want to do with this item. There is the report from Pedestrian Safety and Access Task Force,

<http://www.a2gov.org/departments/systems-planning/programs/Documents/Pedestrian%20Safety%20and%20Access%20Task%20Force%20Final%20Recommendations.pdf>

which has specific recommendations with some prioritization. Also the google group with all of the documents and minutes for the Task Force

<https://groups.google.com/forum/#%21forum/AA-ped-safety-and-access-task-force>

What can we do with that document? Should the meeting in October best be used to learn about the plan? Add our weight to the recommendations? Pick an area to focus on? Create a committee to work on this area? The topic is large and we need help on how to cover this. Please plan to share your thoughts during the agenda setting portion of our upcoming meeting, or submit specific requests in writing to Kayla.

I look forward to seeing you Wednesday.

Linda Diane Feldt, Chair Ann Arbor Transportation Commission
