The Michigan Public Service Commission ("Commission") will hold a public hearing to consider The Detroit Edison Company's (Detroit Edison) February 20, 2008 updated request to, commencing in 2009, increase its annual base electric revenues by \$284 million above base rate levels, inclusive of the amounts requested in its April 13, 2007 and August 31, 2007 filings in this proceeding. Commission approval of Detroit Edison's request will result in a net increase in the Company's base electric revenues above the level of base rates of up to \$284 million in 2009 and thereafter (5.96% overall) and elimination of the credit surcharge approved by the Commission in Case No. U-14842. Accounting authority obtained by the Company may be continued or implemented in 2009 and continue thereafter. This proceeding will address material additional costs and changes resulting from the passage of time (including the need for a 2009 forecast test year based on the effective date of rates established in this proceeding), capital expenditures for environmental compliance, Michigan's Business Tax structure, the Company's Electric Choice sales volumes, capital expenditures for the Advanced Metering Initiative ("AMI") and the Company's customer sales class mix. In addition, the Company's request seeks to establish a permanent Choice Incentive Mechanism ("CIM"), establish uniform distribution rates between Detroit Edison full service and Electric Choice customers, establish an emission allowance purchase strategy, establish a methodology for recovery of the costs associated with preparation of a Combined Operating License Application ("COLA") for a new nuclear generation facility, terminate its Pension Equalization Mechanism ("PEM"), expand its current demand response programs, receive miscellaneous accounting authority and obtain recovery of regulatory assets. These and other requests may be implemented if the Michigan Public Service Commission approves the Company's request.
