

To Whom It May Concern:

As long-term owners/residents of a single family home on White Street between Dewey and Granger, we are strongly opposed to the proposed Group Housing Area zoning changes. Specifically, the expansion of the Group Housing Area as far south as Dewey would degrade the neighborhood by increasing student density very near to our single-family-centered block.

I believe that it would be reasonable to limit the Group Housing Area zoning to only go as far south as McKinley. This would provide for higher density student housing closer to campus and still maintain a buffer between high-density student housing and residential housing.

Thank you for your consideration.
