Subject: University Inn

To the Planning Commission:

On your meeting agenda for August 3, is a discussion of University Inn at 2424 East Stadium. I just heard that it will be an all-electric building. I am so grateful that the developer has decided to meet the standards of the A2Zero plan, thus avoiding fossil fuel infrastructure.

Climate and the environment are my top priorities and, as such, I applaud development like this, especially on our public transit corridors. This is one of the most important ways for us to reach our city's decarbonization goals.

Please give this proposal every consideration at your August 3 meeting.

Best,
Leah Gillon
