Subject: EV chargers with new construction

I am a bit concerned that new chargers being installed with new construction are inadequate. These are no better than chargers at home. Who can I pester to make sure Ann Arbor gets mandatory level 3 and level 4 chargers instead of these slow level 2 home chargers with new construction? The way things are right now, there is no agreement on how fast they should be. We should not allow level 2 chargers as level 3 and 4 can charge slow and fast. We should be building infrastructure for the future. Not the present..

Hope I've got the right email to bug the city about this..

-Jeff
