Subject: No transient student housing in Huron Highlands!

I am writing you to express that I am against a large apartment complex off of Skydale Drive. If any development should be done, it should be Single Family detached homes, like the current surrounding neighborhood, not large apartment complexes (especially for college students). I was a college student and remember my surroundings at that age. There is no place for an undergrad population around and within the Huron Highlands family neighborhood.

This is NOT discriminatory towards that population.....but there are more conducive places where their type of housing would be more appropriate. Again, if anything should be built, it should be Single Family homes.

Thank you!!
