Subject: The George converting existing space

Sent from [Mail](#) for Windows

Please note that I am not in favor in letting the developer convert existing space of The George into another 42 dwellings. This was approved with the understanding of the residents in the area that we would have some retail for the residents to replace what we lost several years ago when the existing buildings were torn down. If the developer is having trouble leasing for potential businesses I would suggest that he reduce the amount of the intended leases. We need some more retail in the area, not more apartments/condos. Is this just more greed by the developer. I believe so.

Please let the members of the Planning Commission know of this email.
Thank you for your time.
