The Comprehensive Plan process needs to be paused. We have seen nearly a year on “community engagement” with one set of plans; a sudden shift in the past few months; with staff and a few voices on Council realizing that there is a renewed need for input. Meanwhile there is little evidence of the type of discipline that a plan should include, such as objective, representative data. Moreover, there is no evidence that infrastructure needs such as water, road traffic, transit, stormwater and sewer, etc., have been seriously studied.

This is a long term plan; why try to sprint???

Let's pause for genuine community input and detailed staff work on infrastructure.

Respectfully,

Brad Pritts
