Hello,

Thank you for this opportunity to comment on the 'Environmental Commission Recommends the Inclusion of Natural Features Sustainability in Ann Arbor City Planning and Development' resolution.

Although I understand the need for higher density housing, I am alarmed by the scarce attention to natural features in the ongoing Ann Arbor Planning and Development. Greenspace and respect for the natural prairies and woodlands that came before urbanization are among the greatest strengths and characteristics of Ann Arbor. To allow those values to take a back seat to bringing more people and business into the area would be a shameful disregard for the unique qualities of this place and people.

I strongly support the resolution to include natural features sustainability in the A2 planning in order to increase attention to natural features and biodiversity.

Thank you ,

Carolyn Green
