Subject: comprehensive plan

Hello,

I am not in favor of the comprehensive plan draft. I think City planners should add information, including costs, about upgrading the infrastructure to accommodate a large increase in population. Already, our systems and roads are in need of costly repairs.

Another issue with the plan is the lack of a specific way to provide affordable housing, especially for families. We don't need anymore student housing. The University should house its student population and not increase enrollment until it can meet that need.

My final objection is that all the proposed density in current neighborhoods will result in the loss of trees and greenspace.

Thank you for reading my letter.
